Company history

Expertise, quality, ideas and visions - since 1901

Hans Grohe has become a pioneer in the bathroom industry - and has been shaping shower culture since 1901. With its brands hansgrohe and AXOR the company represents high-quality, design-oriented products around the world, as well as trendsetting bathroom concepts and environmentally-friendly sanitation technologies. The recipe for success: tradition-based innovation coupled with sustainable corporate thinking - all enhanced by our great passion for the element water.

Hansgrohe's innovative products

Tinkering and testing, inspecting and perfecting

Hansgrohe can look back on a rich culture of innovation. Many concepts and solutions developed and designed at Hansgrohe have provided incentives for the international sanitary industry. The bathroom professionals achieve around one third of their total turnover with new products.

Quality at Hansgrohe

Made in Germany branded products

Around 80% of Hansgrohe production takes place in Southern Germany: in a total of five plants in Schiltach and Offenburg. This despite the fact that Hansgrohe achieves around 80% of its sales revenue abroad. The question is, why does a company with a broad international base still produce in Germany - when it would seem to be more cost-effective to produce all over the world? The answer from the Black Forest is: because we count on German expertise and offer our customers a guarantee of quality.

[Quality made by Hansgrohe](#)

Trust in quality "Made by Hansgrohe"

Offering the customers the highest quality at all times is a fundamental part of the Hansgrohe company philosophy. We therefore offer consumers a voluntary five-year manufacturer's guarantee on our products.

About the CE-Marking

The Construction Products Regulation (CPR) repeals the Construction Products Directive (CPD). By 1st July 2013 the new regulation was established for the relevant construction products. The CPR is to ensure reliable information on construction products in relation to their performance.

The essential performance requirements are defined in Harmonised European Standards (hrEN) or European Assessment Documents (EAD). If the essential requirements for a construction product are described in a hrEN products shall bear the CE mark. Construction products without harmonised hrENs and without EADs cannot show the CE mark. The relevant European Standards for the Hansgrohe products (Taps; Shower and bath mixers; Thermostatic mixers; Bidet mixers; Shut-off valves; Showers; Kitchen mixers) are not Harmonised European Standards. Thus a CE mark for these products is not possible.

Green Company

Hansgrohe is a "green" company by conviction. This stands for: waste management (recycling rate 85%), manufacturing processes (optimized use of energy, water and chemicals), product development (e.g. spray laboratory) and the use of renewable energies (solar power and heat recovery).

[Hansgrohe Green Company](#)
[Sustainability Report](#)

According to our conviction we develop our products with the latest technology to conserve resources. Hansgrohe products, which are fitted with the EcoSmart technology, consume up to 60% less water compared with conventional products - and this without any loss of comfort. Lower hot water consumption also means lower energy requirement.

Mixers	Thermostats	Showers	Air Power	Eco Smart
Maximal flow rate of 5l/min.	Directly the right temperature.	Great shower pleasure with only 9l/min.

iSpecify

The recently launched tool iSpecify is Hansgrohe's service for design professionals to discover, select and configure bathroom solutions.

You can see a wide collection of international reference projects, all realised with Hansgrohe's products. All projects come with a complete list of products and supplementary products, ready for use in your own specification. Additionally iSpecify allows browsing by typologies, matching the basic design concepts you have in mind.

Following you can collect all your chosen products in your own project folder, sort them in different rooms and projects, download product data, images, technical information and your personal spec sheet.
