Metris®

Comfort at all levels.

How high is just right for you?

Discover the new **Metris** range now.

Water is an elementary part of our everyday existence and serves not just a single purpose, but has thousands of different uses. Thankfully, the Metris models are as varied as the ways we use water in our daily lives. There is no longer a need for compromise: Metris allows you to find exactly the mixer height that suits you and your individual needs. At Hansgrohe, we have to compromise a name for this extra personal space: ComfortZone.

Water is a precious resource and we value it greatly. We value it so much that we ensure your consumption never exceeds five litres per minute. EcoSmart is a sophisticated technology for using water more efficiently, cutting your water consumption by up to 60%. Visit [hansgrohe-int.com/savings-calculator](https://www.hansgrohe-int.com/savings-calculator) to find out how much energy and water you can save with our products.

ComfortZone 260

Metris 260

The Highriser offers you the greatest freedom by far: the ComfortZone 260. At last, it becomes easy to fill up a tall vase. At last, you can enjoy the ComfortZone that gives you all the space you need.

ComfortZone 230

Metris 230

If the extra mixer height alone doesn't live up to your expectations, we recommend the swivel mixer which gives you even greater freedom of movement. With the ComfortZone 230 and the convenient swivel spout, even filling up a large fish bowl becomes easy.

ComfortZone 200

Metris 200

Since this mixer offers more space, it is ideally suited for a family household. For example, you can fill up watering cans with the greatest of ease - this is just one of the many ways to take advantage of your new ComfortZone 200.

ComfortZone 110

Metris 110

If you're looking for greater freedom of movement, for example to make your daily shave more comfortable, the ComfortZone 110 is the right choice for you. This extra space offers you a noticeable gain in freedom - every day.

ComfortZone 100

Metris 100

Even a small space can lead to greater comfort. This is proven by the ComfortZone 100, which not only serves the daily purpose of washing your hands, but is also a subtle, yet stylish addition to your guest bathroom.

Style Worlds

Every bathroom has its own atmosphere, its own layout, shape and colours. What's important is that your bathroom makes you feel at ease and that the stress of everyday life is left behind. To make it easy for you to find your personal space for wellbeing, we at Hansgrohe have developed different style worlds.

You decide whether you prefer distinct shapes and clear lines or a subtle design with organic forms. Do you like a design that is minimalist, playful or classic? There is only one explanation for this variety: Our style worlds have to be as diverse as the people who we designed them for – you.

Which mixers for which ceramics?

The Hansgrohe recommendations.

Only in combination with a matching wash basin can a Metris mixer exactly meet your expectations. Our ceramics recommendations are not rigid rules, but serve instead as visual guidelines for finding the perfect combination for you.
