World of Styles.
Talis®.
**Talis, my choice.** Tastes are different, people are different, and so are bathrooms. It is not surprising – where else nowadays can you spend time undisturbed, for yourself and just by yourself? Isn’t it natural to want to make the most of this precious retreat? This understanding and the belief that high-quality design does not need to be expensive brought about Talis, a range of mixers that leads the way in form and price.

The new, extended Talis range places human beings and human needs at the centre of attention. The choice is yours, thanks to the Hansgrohe World of Styles: From basin mixers right through to the matching showers of the Croma range, all products of the Talis series are available in three different styles – E for Elegance, S for Style and C for Classic. Three complete and consistent style worlds to choose from, to match your taste, your lifestyle and your bathroom.

Design alone is not enough. It’s your choice, your world. Talis helps you to create your bathroom.
Harmony through contrast. You are passionate about creative combinations. You love exciting contrasts and a modern mix of styles. You wish to create a warm and welcoming atmosphere which mirrors the many facets of your own personality.

Space for yourself. You are the clear, analytical type. You have an aversion to ornaments and embellishments. You find your strength in tranquility and by focusing on the essentials. Your style is straightforward and minimalist, leaving space enough for you.

The value of personality. You are a lover of classical style, in matters of culture, cuisine and home furnishing. You love being surrounded by beautiful things which remind you of precious moments. You create a harmonious ambiance by means of your intuition and personality.
Talis® E² basin mixer. The development of the “Elegance” design world was inspired by organic natural forms. This basin mixer has delightfully harmonious curves, elegant edges and shiny surfaces.

Talis® E² bidet mixer. The idea behind the design of the Talis E² series is also apparent in the single lever bidet mixer: Just as in nature, the combination of flowing forms and high-quality surfaces provides exciting contrasts.
Talis® E exposed shower mixer. Organic forms are present in the entire line. This shower mixer commands attention with its flowing lines and aura of motion.

Talis® E concealed shower mixer. With its harmonious curves, this concealed shower mixer will win you over with its looks and state-of-the-art Hansgrohe technology.

Ecostat® E exposed shower thermostat. Elegant look, impressive technology: the sleek thermostat enhances the pleasure of every shower.
Talis® E² exposed bath mixer. Enjoy a bathroom where everything matches. Talis E² embodies coherent, harmonious mixer design, also apparent with the bath mixer for exposed installation.

Ecostat® E exposed bath thermostat. The sweeping lines convey a look of elegance while reliable Hansgrohe technology provides a world of pleasure in the bath.
Style
Talis® S² basin mixer. The “Style” design world is characterised by timelessly clear, geometrical use of forms. Here, less is more. The firm lines, slenderness and height provide a sense of confidence and quality. The sloping design creates a dynamic appearance.

Talis® S² basin mixer with swivel spout. Functional, attractive and somehow familiar. It is the archetypal twin handle mixer, modernised in form and function.
**Talis® S² exposed shower mixer.** Class, no mass – a strict realisation. No superfluous detail. Simple, timeless geometrical basic forms, far from any modern fad.

**Talis® S² concealed shower mixer.** The looks are stylish, the inside highly functional. With its cylindrical pin handle, the high-quality mixer technology is extremely easy to operate.

**Ecostat® S exposed shower thermostat.** An uncompromising and straightforward shower thermostat with a singular focus: pure shower enjoyment.
Talis® S² exposed bath mixer. The refreshing clarity of the Talis S² line is compelling down to every single detail. The bath mixer for exposed installation is a beautiful example.

Talis® S² concealed bath mixer. This concealed bath mixer fully reveals the design concept: Talis S² is the right choice for everyone who loves clarity and style without compromise – also in the bathroom.

Ecostat® S exposed bath thermostat. S for straightforward: with its clean, discreet look, the Talis S bath thermostat blends perfectly into the Talis S range.
Talis® Classic basin mixer. The name says it all: with its elegant curves, the Talis Classic basin mixer presents itself in truly classic style.

Talis® Classic Natural. Unique in appearance: before pouring into the basin, the water flows through a wide, spacious channel – an extraordinary experience of water and design.
Talis® Classic exposed shower mixer. The Talis Classic shower mixer is inspired by classic shapes, perfectly exemplified in the characteristic handle.

Talis® Classic concealed shower mixer. The Talis Classic shower mixer for concealed installation cuts a fine figure. On the inside, it shines with reliable Hansgrohe technology.
Talis® Classic exposed bath mixer. This bath mixer for exposed installation exhibits the classic lines and the design characteristics of the entire Talis Classic line.

Talis® Classic concealed bath mixer. The missing piece in a harmonious series: The Talis Classic bath mixer for concealed installation promises the utmost in aesthetic value, reliable Hansgrohe technology and a bathroom with personality.
