

Hansgrohe – the right choice for your project.

German quality since 1901.

Ever since Hansgrohe SE was founded more than 114 years ago, the company has built a reputation within the bathroom industry as one of the leading innovators in technology, design and sustainability. The global Hansgrohe and Axor brands offer you a large selection of high-quality mixers, showers and shower systems suitable for all requirements and budgets.

Innovative technologies.

Hansgrohe offers products with genuine added value. They are notable for their reliability, long life, innovative functionality, easy installation and intuitive operation. Our goal is to make the bathrooms of your customers more attractive and convenient.

Award-winning design.

Hansgrohe works closely with internationally renowned designers. The company consistently receives globally coveted titles: more than 450 international awards are testament to the sanitary manufacturer's quality standards including iF, Design+ and Reddot.

Savings with EcoSmart.

At Hansgrohe, every drop counts. With our innovative products and groundbreaking technologies, we help with resource conservation and sustainable construction. The EcoSmart technology enables you to save both water and energy, saving costs for your project over the long term too.

Customised products.

Axor Manufacturer can provide bespoke solutions for your project's requirements: whether you need alternative mixer lengths, engravings or the integration of a logo. We use PVD technology to offer you a wide range of finish colours, which provide long-term brilliance and durability.

Project consultancy.

Our global network of specialist project consultants will support you with technical expertise during the installation planning and construction acceptance phases, at your project location. We help you to select the right products, enabling you to avoid follow-up costs over the long term.

Invest securely.

Availability of spare parts for all our products is guaranteed for 10 years. So you can even be confident of obtaining spare parts for your earlier projects, with no need to completely replace products.
