The *charm* of the **Axor** Citterio E collection lies in the fact that it is **modern functionality**. This collection is a perfect combination of timeless high quality and refined elegance.

The new collection, which the **Axor** brand developed in conjunction with Antonio Citterio, the Italian ‘Gentleman of Design’, also enhances everyday items. Including the bathroom itself. It’s a collection for washbasins, into any *classic* or *modern* ambience – making them ideal for both
a combination of the familiar and the brand new, of classic appeal and of timeless **high quality** and **refined elegance**. The day-to-day

**Antonio Citterio**, the Italian ‘Gentleman of Design’, also enhances showers and bathtubs, and the products can be seamlessly integrated into city apartments and art nouveau villas.
Axor Citterio E
How is it possible for a washbasin to adequately reflect the sheer opulence of water? Through the use of precisely-formed surfaces and edges which, together with gentle curves, make this collection soft and harmonious to the touch. Not to mention classic forms like the elegant, iconic handles. Has a faucet ever been such a joy to use?
Elegance and ease of use are cornerstones of the Axor Citterio E collection. Precise surfaces and edges, combined with soft shapes and SoftCube design elements, all demonstrate exceptional quality. From the single-hole faucets with joystick handle (opposite page) or lever handle (below left), to the wall-mounted single-handle faucet (below), this collection also delights with a wide range of ADA-compliant faucets, each with its own distinctive function and style. What’s more, the elegant Axor Universal Accessories products are always the perfect complement.
The wall-mounted widespread faucet features the iconic cross handles. These are ergonomic and contoured with soft curves, so that they fit comfortably in the hand and are easy to operate.
Even in a bright space — such as a hotel bathroom with an abundance of white marble — the single-hole faucets have a striking appearance around the washbasin, and are particularly extravagant as shown in polished red gold, a unique custom finish which is available exclusively through special order from the Axor Manufaktur custom service team.

The custom finishing process employs the environmentally-friendly PVD method, providing high scratch resistance, durable surface sheen and high resistance to cleaning products and corrosion. Axor products are exceptionally durable and ideal for projects such as hotels where enduring quality is required due to increased levels of use.
Sophisticated design makes showering easier. The diverter handle, featuring clear symbols, to intuitively control the outlets and the iconic cross handle to conveniently control the water volume. The water temperature is regulated via the cylindrical thermostatic handle. The ergonomic holder on the elegant wallbar with double railing provides for easy height adjustment of the handshower.
/ In the Shower /
There are virtually no limits to the possibilities when it comes to customizing the shower’s design: The thermostatic module can be installed horizontally or vertically — with individual escutcheons for 3 functions or with a plate for 2 functions. The unique rough-in system follows the modular principle of the tried-and-true Axor ShowerCollection, which enables simple and accurate installation with consistent spacing between trims, for a structured, well-ordered appearance. This modular system provides virtually unlimited opportunities for incorporating more individuality and creativity into the shower design: For example, using the shower module or the porter unit. Matching products from the Axor Universal Accessories collection complement this shower installation.
Select technology makes showering easier and more convenient. Particularly in a hotel bathroom, where the guest needs to be able to operate the shower controls intuitively. Control all of the shower functions easily with the Axor ShowerSelect thermostatic trim, at the simple push of a button. The wallbar’s multi-functional handshower holder makes it easy to adjust the angle of the handshower to suit the height of each individual user.
This timeless and classic design, featuring precise edges and soft shapes, is also continued in the bathtub: For example, the cross handles on the freestanding tub filler. Switching water flow from the tub spout to the handshower using the integrated diverter is effortless – even with soapy hands.
Sleek diverter alternates water flow between tub spout and handshower.
The 4-hole thermostatic roman tub set is an exquisite product for the bathtub. What’s more, its handles can be operated conveniently and intuitively: The temperature is regulated via the cylindrical handle, and the water volume via an ergonomic cross handle.
The freestanding tub filler is a prominent eye-catcher in the room. The sleek handshower features two spray modes, and the elegant cross handle controls the water volume and the temperature can be safely adjusted via the thermostat.

INSTALLATION WITH THERMOSTATIC 3-FUNCTION TRIM MODULE, 15" X 5"

Ergonomics:
- All functions are easy to use thanks to the ergonomic horizontal arrangement of the control units, handshower, and Shower Basket
- The lever handle of the 3-way diverter points to the selected outlet
- The water volume is controlled via the volume control with cross handle, and the temperature is preset via the cylindrical thermostatic handle

Shower Modules:
- Can be used as a shoulder or body shower
- Adjustable in 3 positions – to target specific areas of the body

5 x 5 Principle:
- Convenient shower solution for small or large bathrooms
- With the motto “Just mix it!”, the modular system and 5”x5” product range offer greater opportunities for incorporating more individuality and creativity into the shower design

Accurate Installation:
- Rough-in system based on the Axor ShowerCollection featuring a sophisticated modular principle
- Accurate installation with consistent spacing between each trim for an orderly look.

COMPONENTS:
- Thermostatic 3-Function Trim Module, 15”x5”
  Part no. 36704001
  Part no. 36708181
- Handshower Porter with Outlet
  Part no. 36724001
  Part no. 28486181
- Raindance Select S 120 AIR 3-Jet Handshower
  Part no. 26531001
  Part no. 28276003
- Axor Downpour 240 AIR 1-Jet Showerhead
  Part no. 28494001
- Extension Pipe for Ceiling Mount
  Part no. 27479000
- Axor Universal Shower Basket
  Part no. 42802000
INSTALLATION WITH AXOR SHOWERSELECT SOFTCUBE 2-FUNCTION THERMOSTATIC TRIM

The complete shower experience:
- Axor Downpour 240 AIR 1-Jet Showerhead and also the Raindance Select S 120 AIR 3-Jet Handshower – for a great all-around shower experience

Wallbar with Handshower:
- The handshower combined with the unique Axor Citterio E Wallbar, provides both the benefit of a handshower, and also a fixed showerhead, and is adjustable to multiple heights and positions – accommodating users of varying heights

Intuitive operation:
- Thanks to Select technology, based on the iBox Universal Plus rough, the outlets can be operated at the simple push of a button
- Large symbols that are easy to understand
- The ShowerSelect thermostatic trim maintains your perfect temperature for the 2 functions
- The ShowerSelect thermostatic trim can be optionally configured to operate both shower functions simultaneously, or not – Always comply with the local plumbing codes in your area
