**EXPRESS yourself**

**iControl® mobile**

## **A digital dream comes true**

Close your eyes. Imagine waking up, enjoying a good stretch, intuitively pressing a button and listening to a soft, pattering sound. A gentle light comes in through the crack of the door, leading you into the bathroom, where the pleasant sound of the shower already awaits you. Full of expectation, you place yourself under the all-encompassing shower rain and feel the warm water embracing your entire body – an incredible experience ... A dream? No, it's a wonderful reality, thanks to Hansgrohe's iControl mobile. Enjoy digital Shower Fun XXL with innovative wireless technology, which lets you control shower and lighting whenever and wherever you like – even from your bedroom!

# Digital lifestyle

Life can be so beautiful – with Hansgrohe’s iControl mobile! We believe that technology should make everyday life more pleasant, simplify the things we do and support us rather than challenge us. This is why we invented iControl mobile: an innovation which meets these expectations, and reflects your personality and your lifestyle – a distinctively Hansgrohe solution. This system allows you to control three showers and lighting all at once. As a perfect complement to the cutting-edge Hansgrohe Raindance Rainfall and Raindance Rainmaker shower systems, iControl mobile is a bathroom innovation for which you will be envied.

Raindance Rainmaker

Raindance Rainfall

# Warm up your life

A cold shower? Never again! Quite the opposite: as soon as you have started the shower with iControl mobile, the cold water sitting in the pipes drains away. When you enter the shower, the water will already have reached your preferred ideal temperature – and you are instantly embraced by a pleasant, welcoming warmth. Shower Fun XXL, preset to the perfect temperature. Is there a nicer way to start your morning?

Thanks to its remote control technology, the system works outside the bathroom – for example from the comfort of your bedroom.

# Clicking your way to shower pleasure

Just one click to shower pleasure – made possible with iControl mobile and the magic of intelligent wireless technology. Your shower pleasure starts with the simple push of a button on the clever remote control: Click – the water begins to flow. Click again to choose your favourite spray mode – from a wide shower rain to a gushing shower reminiscent of a waterfall. Another click – and everything is immersed in atmospheric lighting, crowning your shower experience. Simply click – and all that remains to do is enjoy ...

# Wireless fun

At Hansgrohe we believe wireless is simply better – and so we developed iControl mobile entirely on the basis of cutting-edge radio technology. Since the energy required for the radio signal is generated simply by pressing the button, the system is 100 % maintenance-free. The remote control works without a battery: you simply take it out of its holder – for example in the bedroom – then choose your spray modes and turn on the lighting. Once in the shower, simply place it in its convenient holder. Brilliant – those who have tried it once, never again want to go without!

# Invisible magic

Innovative technology often works its wonders invisibly. iControl mobile conceals its electronic core behind its holder and remote control – in the iBox universal. Activated by the radio signals, the electronic magnetic valves release or shut off the water supply to the different spray modes in the overhead shower. The iBox universal is low-maintenance, yet easily serviced if ever necessary: the internal mechanism can be comfortably accessed through the cover plate.
