and Ecostat Comfort bath thermostat,
shower arm 350 mm
27298, -000

Crometta® – Easy water and energy savings

With EcoSmart technology

The new Crometta showers with EcoSmart technology are not only visually appealing, but also ideal for renovating hotel and private bathrooms that demand water and energy savings as well as low flow rates. This is especially important to meet building regulations and certification requirements.

Calculation for private households

EcoSmart Technology

An ingenious flow rate limiter and special spray jets reduce the consumption of water to 6 and 9 l/min. Less water then needs to be heated, saving both energy and water costs.

Technical data for Crometta® Vario hand showers

Vario	EU-Standard	EcoSmart ≈ 9 l/min	EcoSmart ≈ 6 l/min
Water consumption is depending on spray type	13-16 l/min	max. 9.9 l/min	max. 6 l/min
Fully functional from	6.2 l/min (0.4 bar upstream to the shower)	3.8 l/min (0.4 bar upstream to the shower)	3.8 l/min (0.4 bar upstream to the shower)

Hansgrohe Savings Calculator

Hansgrohe showers with EcoSmart technology not only offer elegant design and maximum comfort, but thanks to the savings in water and energy, they often pay for themselves in just a few months. How high the potential savings are for hotels and private households, and how fast the full return on investment, can be determined quickly and easily with the free Hansgrohe Savings Calculator.

Calculation for hotels:
