Metris®. Focus®.

ComfortZone. Comfort at all levels.

Treat yourself to more space.

With Metris and Focus.

The bathroom has long been more than just a place for personal hygiene. It has become a living space. Metris and Focus now give

you the freedom to design the space exactly like you want it. We all use water differently; we all have our own daily rituals and tastes.

These different requirements are met by our new faucet series – by individual height, form and function.

Metris[®]

Focus[®]

Pleasant: More comfort in daily use.

Practical: More room for washing hands.

Luxurious: Easy to fill tall containers.

Meet your own requirements.

With your own personalized ComfortZone.

The height of a faucet determines how you are able to use water. Do you simply want more room for washing your hands, or do you want enough room to fill a watering can with ease? One thing is certain: The taller the faucet, the more flexibility you will have in your daily life.

We have a name for the space between the spout and the washbasin: ComfortZone. It's having a little bit more comfort when you're brushing your teeth in the morning. It's having the option to quickly wash your hair. It's having the feeling of being able to freely decide how you want to use water.

And when you have decided on the height and chosen your favorite design, you can then choose from the many combinations of faucet and washbasin. Find your own personal solution with Metris and Focus. Or rather, your own personal ComfortZone. Create a space that is right for you.

Metris®.

Comfort at all levels.

Experience our new, stylish faucet line.

Metris presents design with a variety of options. The new faucet line embodies a decidedly modern aesthetic with minimalist construction and subtle flair. The varied

ComfortZone heights empower the user with a range of possibilities: Remodel your guest bath, fill tall containers, or lean over the sink to wash your hair.

Metris gives you freedom and choice – from the Metris 100 to the flexible spout of the Metris 230 to the generous highriser, Metris 260.

Focus®.

Comfort in every home.

Superb design meets practicality with Focus.

Focus offers Hansgrohe quality at an affordable price. The new Focus 70 faucet includes a base plate, making it the ideal retrofit solution. It is also perfect for small

spaces, as is the Focus 100 single-hole faucet. Thanks to its generous height and swiveling spout, the Focus 240 allows for tremendous freedom of movement.

Operated from the side, the water stream can be easily controlled. Finally, this faucet series is rounded out by the Focus 100 widespread faucet.

Ultra comfortable: Tall swivel spout for tremendous freedom of movement.

Ultra flexible: Convenience becomes apparent as faucet height is tailored to your needs.

Ultra practical: Chose the most suitable height for your daily use.

Every ambience deserves the perfect faucet.

Mix and match with the Hansgrohe Ambience Configurator.

Each bathroom makes a statement. Matching the perfect faucet to the sink is one of the most important aspects of this statement.

To help with this task, Hansgrohe now offers the online Ambience Configurator. Easily envision your options while matching the

latest Hansgrohe ComfortZone faucets with multiple sinks and bathroom environments. Imagine the possibilities.

The screenshot shows the Hansgrohe website's navigation menu with 'Products' selected. The breadcrumb trail reads: Home > Products > New products > The Hansgrohe brand > Metris, Focus > Ambience Configurator. The main content area features a large image of a modern bathroom vanity with three faucets. The text 'Which faucet suits which ambience?' is overlaid on the image. A 'select' button with a checkmark is visible at the bottom of the image. On the left side, there is a sidebar menu with categories such as 'New products', 'The Hansgrohe brand', 'Metris, Focus', 'Raindance Select Showerpipes', 'PuraVida', and 'Kitchen'. The text 'Ambience Configurator' is displayed at the bottom of the main content area.

Comfort means having the choice.

Create your dream bathroom from these elements.

Meets your requirements — and the environment's.

Maximum water pleasure with reduced water consumption.

At Hansgrohe, our products prove that sustainability and performance are not mutually exclusive. Metris and Focus faucets combine ease of use with sustainable technology. Reduce water consumption by up to 30% with EcoRight technology: The precision "O" ring flexibly responds to the available water pressure: the higher

the pressure, the smaller the ring opening; the lower the pressure, the more the opening widens. Less water has to be heated, so you save energy and reduce your CO₂ output. Hansgrohe innovation does not stop there. Thanks to AirPower technology, the water is infused with air, producing a voluminous, splash-free jet flowing at 1.5 GPM compared

to the standard 2.2 GPM. And QuickClean guarantees that you will have years of pleasure with our products, because it makes it easy to remove limescale deposits from the spout simply by rubbing them away at regular intervals.

Lots of air in the water results in a particularly soft jet.

Simply rub the flexible silicone nubs to remove limescale deposits.

Limits the flow through your faucet to save water and energy.

The precision "O" ring responds flexibly to keep the waterflow constant: If the water pressure is high, it reduces the size of the flow opening. If it is low, it increases the opening.

Turn your entire bathroom into a **ComfortZone**.

Selected examples of Hansgrohe showers.
