

A woman with long blonde hair, wearing a dark patterned blouse, is smiling as she washes strawberries in a modern kitchen sink. The sink is set into a light-colored countertop, and a sleek, chrome Hansgrohe faucet is dispensing water. Several strawberries are scattered on the countertop and a wooden cutting board in the foreground. The background shows a window and a dark shelf with some items.

hansgrohe

The most beautiful workspace in the house.

With innovative taps and sinks from hansgrohe

hansgrohe. Meet the beauty of water.

Innovative and high quality kitchen design.

The heart of the kitchen can be found where fresh water flows, which is why hansgrohe is always working to make your experience of water more enjoyable. Our products combine clever technology with ergonomic perfection, to make the work you do in the kitchen more efficient and more fun. hansgrohe makes it easy to combine the taps that most suit your needs with a sink of your choice, for the ultimate in easy workflow. Alternatively, choose a state-of-the-art sink combi unit as the focal point in your kitchen. Our ultramodern sinks are designed to serve as the centre of your kitchen, while the specially selected materials and solid workmanship promise long-lasting enjoyment.

hansgrohe. Meet the beauty of water.

Your need are our **priority.**

1 Innovation

- **Revolutionary innovations**
- **Pioneers in the industry**
- **Ground-breaking technologies**

At hansgrohe, we don't just innovate, we revolutionise. Some of our product developments have made history in our industry and changed how people all over the world experience water, every day. We have our own dedicated research and development laboratory where our industry experts have worked to produce more than 16,000 active patents, ensuring that hansgrohe remains the industry leader. We care deeply about you and your enjoyment of our products, in terms of both form and function.

reddot winner 2020

2 Design

- **More than 600 design awards**
- **A design for every style**
- **International designers**

Design can be defined in a number of ways: shape, aesthetic, style. But, at hansgrohe, good design means more than just good looks. As well as world-class appearance, our influential designers also focus on quality and maximum customer benefit. It's our unwavering attention to detail that has earned more than 600 internationally renowned awards. From the big picture to the small details, we take every opportunity to make your bathroom experience the best it can be with our technical innovations. Whether it's Modern, Classic or Avantgarde, we have the perfect solution to suit any need and, most importantly, our timeless designs will outlive fastpaced fashion trends.

3 Quality

- **Experts since 1901**
- **Made in Germany**
- **5 year guarantee***

Since 1901, people all over the world have put their trust in hansgrohe's durable products from the heart of the German Black Forest. hansgrohe is synonymous with high-quality products of exceptional design, ease of use and intelligent functions. Since our foundation, 'Engineered in Germany' has been a recipe for success and remains an integral part of our philosophy. This level of German expertise is recognised as a guarantee of excellence and every one of our facilities works to the high standards that we set. As testament to this, we offer a 5 year product guarantee* and hold spare parts for discontinued products for a further 15 years.

4 Service

- **Support and valuable expertise**
- **Always here to help**
- **Exhibitions to explore**

Customer satisfaction has, and always will be, our primary focus. At hansgrohe, we work in partnership with you to ensure the best possible solution. Being able to deliver top-quality, personal service to our customers at all times is a key part of how we operate as a company. No matter the question, problem or special request, we are here to help.

hansgrohe in the kitchen – more comfort, more style.

The kitchen is the heart of your home – the place where you most need comfort, design and efficiency, so that you can cook freely with everything on hand. In the perfect interplay of style and function, hansgrohe has designed a totally new experience in the kitchen. Learn about our innovative sinks and kitchen mixer taps, as well as completely new combinations designed to revolutionise your time in the kitchen. Check out our latest accessories, where you will discover that every small detail has the power to make your work in the kitchen easier than ever.

New products – make your kitchen work easier.

Aquno Select M81:

The inimitable Aquno Select M81 kitchen taps create a ultra-modern way of working, with ultra-efficient water management at the sink. The incredible design results in water that flows in a completely new way. The large, innovative SatinFlow spray is unique, redefining how you work at the sink. It allows you to gently wash food, clean large objects without splashing and wash your hands, all while conserving resources. Finished with a tailor-made multi-function strainer, preparing and cooking food has never been so efficient, simple or pleasurable.

Talis M54:

Sleek and minimalist in design, uncompromising in function and quality, so that your every movement becomes a highlight. The Talis M54 kitchen taps display a slimline silhouette, giving a stylish look to every modern kitchen. Alongside the chrome and stainless steel finish option, the matt black choice provides an eye-catching alternative. The range includes a choice of key basic shapes and comfortable heights, allowing the taps to be incorporated into a wide variety of kitchen styles.

Metris Select M71 & M51 Select Talis additions:

The new addition to the popular Metris Select M71 and Talis Select M51 kitchen taps feature a newly developed shower head that combines two features: hansgrohe Select technology and two jets on the hand spray. The benefit to you? One-handed operation and even more precise water control.

S41 stainless steel sinks:

The sinks designed to weather the practicalities of everyday life. The organic and simple design language blends with any kitchen style. Variable installation options and exchange possibilities make them an incredibly flexible choice. Also suitable for base units with a width from 45 cm, they offer easy ordering thanks to integrated manual or automatic waste set.

Accessories and cleaning products:

Getting things done is so much easier when you have the right tools. That is why hansgrohe's new products make working in a hansgrohe-fitted kitchen as comfortable as possible. Our washing up liquid dispensers work with every kitchen tap. Our multi-function strainer, detachable draining board and chopping board make multitasking easy. Cleaning and care spray protects stainless steel and SilicaTec against dirt, staining and limescale deposits.

Technologies

Flexibility: The combination of the Select button and pull-out spout makes work at the sink simpler and more comfortable. The hose can be extended by up to 76 cm, which extends your working radius and makes filling containers much easier.

Space to move: Thanks to Select technology, water flow can easily be switched on and off manually with your finger, back of hand or arm. That means more freedom of movement and easier multitasking, so you can work more efficiently.

Speed: The Select button on the front edge of the sink lets you start and stop the water flow quickly and conveniently. The drain is opened by turning the control unit.

Select

Convenient push button operation

Select technology makes operation simple and convenient. With just one press, you can pause or restart the water flow. Designed to be operated with your elbow or back of the hand, your hands can stay clean.

Advantages:

- Start and stop water at the push of a button
- Optimised water flow and comfortable operation
- Can be operated with an arm or elbow

ComfortZone

Complete freedom of movement

The extra high spout offers plenty of space and is ideal for filling containers. Taps can pivot to provide more room, either partly or entirely, depending on the type of single lever tap chosen.

Advantages:

- Optimum height to suit every need
- Flexible pivot to prevent over-rotation
- Maximum freedom of movement

Technologies

Pull-out function

Extended flexibility

The pull-out tap extends your working radius and therefore your work space at the sink, which is useful for tasks such as watering plants or filling a coffee pot. Do you want to use the pull-out shower spray or the spout? It's your choice, as this kind of tap allows you to choose either. It also has our intuitive Select technology, which allows you to turn the water on or off at the touch of a button.

Advantages:

- Standard pull-out length max. 50 cm
- The sBox extends the operating range up to 76 cm, increasing your workspace by around 50 %
- MagFit magnetic shower holder for easy withdrawal of the hose and a perfect fit with the tap

sBox

Cleverly stored

The space under the sink provides storage for many household items, from detergents to dustpans, which can obstruct the smooth functioning of a pull-out hose. But with the sBox, the retractable hose can be pulled out easily and quietly, before being safely stowed away and protected from damage.

Advantages:

- Smooth, safe extension and retraction of the hose, avoiding contact with other items stored under the sink
- Numerous mounting possibilities in the cabinet, due to flexible fasteners
- Reduces clutter in the sink cabinet
- Hose weight in the sBox ensures smooth and silent use
- An additional spacer rail that allows for installation lower in the cabinet body

Technologies

Normal spray:

Fuller, lighter and softer droplets from an aerated spray, thanks to AirPower technology.

Laminar spray:

Crystal clear and economical, without added air. Ideal for quickly filling large containers, and can prevent splashing.

Shower spray:

Economical and cleansing. Also perfect for fast spraying at the sink.

SatinFlow spray:

Efficient, splash-free and economical water consumption. The wide spray pattern gently blankets food, cleans large objects such as baking trays and saves water when hand-washing.

Spray types

Switch for the task in hand

What you do at the sink changes all the time, which is why you need different spray types. Sometimes you need to fill a container quickly, while sometimes you'll be washing delicate food. Our kitchen taps provide the perfect spray for every task, and you can switch between them quickly and easily.

Advantages:

- Easily change between spray types on the hand spray
- Lockable shower spray
- Spray can be reset at the push of a button
- Intuitive changing thanks to the placement of the button

Installation in front of window

Adaptable to any situation

Windows that open inwards get in the way of fixed kitchen taps. These taps are ideal for installation in front of a window, as you can simply lift and tilt the kitchen taps when you want to open and close the window.

Advantages:

- Ideal for mounting in front of the window
- Allows you to open and close windows with ease

Technologies

QuickClean

Rub away limescale and dirt in an instant

QuickClean's flexible silicone discs mean dirt and limescale can be rubbed off with your finger, with the minimum of effort and no need for cleaning products. This extends the product's lifespan and keeps things working perfectly.

Advantages:

- Quick and easy cleaning
- Long product life

AirPower

For an abundant water flow

AirPower works by drawing in air via the spray outlet. The addition of air enriches the incoming water, making the spray fuller, lighter and softer. AirPower cleverly delivers a high spray volume with less water.

Advantages:

- Fuller, lighter water droplets for an enhanced water jet
- Less risk of splashing
- Higher efficiency contributes towards lower water consumption

CoolStart

Hot water when you really need it

On standard taps the continuous flow heater or circulation pump starts up immediately if the handle is in the middle position. With CoolStart, hot water is only added when the lever is moved to the left, cutting down on energy use, CO₂ emissions and costs.

Advantages:

- Only cold water flows in the default setting
- This can save water and energy, which in turn, saves money
- Better user ergonomics, because the lever for hot water can only be moved to the left

EcoSmart

Save water and energy

Thanks to EcoSmart technology, certain hansgrohe kitchen mixer taps have an aeration of only 6 l/min, saving both hot water and energy.

Advantages:

- A rich, bubbling water spray, thanks to enrichment with air
- Lower energy requirement, and therefore lower fuel consumption and CO₂ emissions
- Double the positive impact, thanks to lower water and energy consumption

Find out how much water and energy you can save using our Hansgrohe Savings Calculator: hansgrohe.com/savings-calculator

KITCHEN MIXERS

Aquno Select M81 – Making your work in the kitchen easier.

The best flow of work sees everything working in harmony, like the inner workings of a clock. With its unconventional design, innovative spray technology and bespoke accessories, the Aquno M81 tap blends all of these elements perfectly. This unit redefines water use in the kitchen. For the first time, you can control the plane of the water, from gentle SatinFlow to a pull-out tap with both a laminar and shower spray. SatinFlow protects delicate fruit and vegetables, using individual superfine jets to wash the food at a shallow angle, quickly cleaning them without causing damage to the skin. This SatinFlow spray will also clean large kitchen items such as baking trays, and offers economical hand washing. Used in combination with the hansgrohe multifunctional strainer, you have the perfect all-in-one concept for efficient water management.

Aquno Select M81

Pull-out function

The pull-out function has two spray modes, so you always have the right tool for the job, whether you want to rinse a saucepan or fill a vase. Combining the hose with the sBox ensures that it can be easily pulled out and then safely stored away under the sink after use. The amount that the spout can rotate is limited, to prevent the accidental spray of water. This is available with or without the sBox.

Multitasking with the multifunction strainer:

Tailored to the dimensions of the splash-free SatinFlow spray, the supplied multifunction strainer allows for the convenient cleaning and draining of food, hygienically avoiding contact with the sink. This hands-free operation means you can get to work on the next step of meal prep.

Switch spray types easily:

Change from the SatinFlow spray to the hand spray at the touch of a button, thanks to Select. Discreetly embedded in the base of the tablet, the green ring around the button indicates the current setting, ensuring safe and predictable water control.

Design accents for the kitchen

Your kitchen should be designed to your specification, combining the elements you need to create your dream space. Paramount to this is the aesthetics. Select Aquano Select M81, and you can choose from three exclusive finishes: elegant stainless steel, matt black or shiny chrome.

Kitchen tap finish options

Indicating the surface finish, each Order No. (#) will have 8 digits, e.g. 28500, -000 = chrome

-000

-670
matt black

-800
stainless steel finish

Aquano Select M81 with L-shaped tap:

Not curved, but set at a right angle, this tap's shape adds to a precise and streamlined kitchen aesthetic. It goes especially well with wall-mounted kitchen units. Aquano Select M81 also offers a pull-out option with laminar spray.

Where ergonomics meets aesthetics – **Metris M71.**

The M71 range is both eye-catching and an indispensable kitchen assistant. Its clean, minimalist design in chrome or stainless steel is ideally suited to hansgrohe sinks, while the ergonomic, comfortable operating concept makes them a match made in heaven. M71 fittings are available at differing spout heights (ComfortZone), with Select technology and many other labour-saving features.

Rocker lever:

With Select technology and a rocker lever positioned at the front edge of the sink, the kitchen tap can be conveniently operated without reaching across the flow of water.

Functional:

By turning the ergonomic rocker lever you can control the water temperature, while tilting it allows you to control the volume of the water flow.

Select button:
With the Select button at the front edge of the sink, the kitchen tap can be conveniently operated from the front.

Operating the Select button:

The water flow can be started and stopped by pressing the Select button. The drain is opened and closed by turning the control unit.

The pull-out spray extends your working space:

The hose is protected from damage as it is secured in the sBox. With the Select button at the front of the sink, the water can be turned on and off at the touch of a button. The handle remains open, maintaining water volume and temperature.

An all-rounder for the modern kitchen – **Talis M51.**

Pull-out hose:

It couldn't be easier to switch between the two spray types. Use normal spray to quickly fill large pots and vases, and shower spray to thoroughly clean kitchen implements and fruit, vegetables or fish. Thanks to the ergonomic design, you can change the spray type single-handedly, while keeping the water flowing.

Select functionality:

Select technology puts water control at your fingertips, whatever you're doing in the kitchen. You can operate it with the back of your hand, elbow or forearm, which is invaluable when you have your hands full or your hands are dirty from cooking. Simply press the Select button to start and stop the water flow quickly and easily.

Additional products

Dishwashing liquid/lotion dispenser:

Available in three different designs and two finishes. We recommend A71 to match the Metris M71, A51 for Talis M51 and M52, and A41 to match Focus M41 and M42, as well as a selection of products from other ranges.

Dynamic elegance – **Talis M52.**

The symbiosis between style and function is immediately obvious in the Talis M52 range. These single lever taps, in either chrome or stainless steel, are all-rounders that suit every kitchen. The pull-out spout pivots a full 150 degrees, and some models can be extended by up to 76 cm thanks to the sBox. This gives you the flexibility and room to work in the kitchen that is so needed. Even positioning the tap close to a kitchen window poses no problem – you can pull the entire tap out to open the window and then replace it.

Tiltable taps in front of windows:

Windows that are open inward in front of normal kitchen taps pose a problem. These taps are ideal for installation in that situation, as you can simply move the tap as needed, allowing the window to be opened and closed with ease.

Design
The elegant spout and simple pin handle characterise the design of this range. The grip position is mounted vertically, which makes these taps the ideal solution for anywhere with limited space in front of the wall. The Talis M52 offers the maximum of flexibility: products in this range are also available for open water heaters, as well as with an isolation valve.

MagFit magnetic bracket:

The MagFit feature enables the hose to slide back almost silently and attach itself back in the centre of the tap spout.

Minimalist lines – **Talis M54.**

GERMAN DESIGN AWARD WINNER 2020

if DESIGN AWARD 2020

reddot winner 2020 best of the best

The perfect complement to your kitchen has arrived: the Talis M54 range. Design requirements vary in the modern kitchen, but in the Talis M54 range you will find options that match every kitchen concept perfectly. Choose the slim and streamlined tap on a kitchen island, or one an alternative that meets the needs of your kitchen, be it a small space or kitchenette with wall mounted cupboards.

Design

Minimalism is found in the details, and in this respect the Talis M54 offers a unique and uncompromising design language. The flat handle accentuates the elongated silhouette of the spout, while the cartridge hugs the base of the tap. Discreetly placed on the inside of the handle is the hot/cold indicator – it is these details that make all the difference.

Talis M54 is available in three different shapes: round arch, L-shape and U-shape. That means they can fit into a variety of different kitchen designs including where there is a kitchen island (round arch), hanging cabinets (L-shape) and classic kitchen units (U-shape).

A perfect black match

The sink and the tap match perfectly, ensuring all components are colour coordinated.

Pull-out hose:

Models are available with or without sBox.

sBox:

With extendible kitchen taps and sink combi units the sBox ensures that the hose can be pulled out and then stowed away safely and easily. The 52 cm tall box fits into all standard base units from 74 cm upwards.

Modern design in motion – **Focus M41.**

The single lever systems of hansgrohe's Focus M41 range are slim and minimalist. The taps are enormously practical, because they can pivot and be pulled out up to 76 cm, giving you the room to move around the kitchen that you need. Plus, due to its shower spray, this product variant will clean food items quickly and efficiently. All this, paired with the reasonable price, means that the range is guaranteed to win you over.

A range of options for your comfort – **Focus M42.**

Updating your sink? hansgrohe offers the Focus M42 kitchen mixer tap range so that you have a range of easy options available, each packed with details to ensure your work in the kitchen is easy and comfortable. The range offers different ComfortZone heights, a full pivoting circle of 360 degrees and, in some models, a pull-out tap and faucet. You also have the option to connect it to your boiler. These easy swaps mean that you can make the switch to the highest quality, at a very attractive price.

ComfortZone spout heights:

Find the right height for you and your needs – for example, the high spout is ideal for filling tall vases.

Rotating swivel range:

Almost all M42 products can swivel 360 degrees. This is particularly useful with low kitchen mixer taps when rinsing things at the sink.

A strong team:

M42, with both a pull-out shower spray or single spray, allows you to switch between a soft shower or clear laminar spray with the press of a button. You can give yourself even more room by choosing a model with an integrated sBox.

Technologies

Regulates the water flow with a simple push: an enjoyable way to start and finish any task.

Defines the height, side clearance and – with the pull-out function – the length of the space around the mixer.

Limescale deposits are easily wiped away by rubbing a finger over the flexible silicone slats.

Reduces the flow rate to save water and energy for long-lasting pleasure.

Enriches the water with a generous quantity of air for a refreshingly reliable splash-free spray.

Cold water starts to flow when it is opened in the basic setting. You consume hot water only when you need it.

The hose extends quietly and smoothly from the base cabinet by up to 76cm.

Spray types

Fuller, lighter and softer droplets from an aerated spray, thanks to AirPower technology.

Crystal clear and economical, without added air. Ideal for quickly filling large containers, and preventing splashing.

Economical and cleansing. Also perfect for fast spraying at the sink.

The soft, flat spray is splash-free, making it highly efficient at saving water.
