Quality you can count on

At hansgrohe, we build on German expertise for the highest quality in form and function. We see, and have always seen, "Made in Germany" as a recipe for success: almost

all our products are made in our home. Our own claim is to offer our customers long-lasting solutions that set standards in functionality and quality – and we do everything to ensure that.

So hansgrohe offers you quality that you can pass straight on to your customers. And that assures you their permanent satisfaction.

15 YEARS
WARRANTY*
*Terms and conditions apply
See www.hansgrohe.com.au

Design

Quality from the Black Forest: Since 1901, people all over the world have been putting their trust in the durable, high-quality products from Germany's Black Forest. And even more than 115 years after hansgrohe was founded, with a production share in Germany of around 80%, Made in Germany is still a firm part of our philosophy. The company has always focused on the benefits and enjoyment of our customers, which is why perfection in form and function has always been, and will always be, our standard. To that end, we still tinker as much as on the first day.

Highest standards: hansgrohe only uses high quality materials that are approved for use with drinking water. They are subjected to long-term tests to assure their compliance with all kitchen requirements. All single parts comply with the relevant standards and are fitted with the optimal precision for safe ease of use and convenience over years to come. The guidelines we ourselves have drawn up for product safety exceed by far most of the specifications usual on this sector. For this reason, a voluntary manufacturer's warranty of fifteen years applies on all of our products. See www.hansgrohe.com.au for terms and conditions.

Design for life: hansgrohe is one of the leading idea generators in the industry. We work with internationally renowned designers to consistently set new standards with modern and timeless products. At hansgrohe, we firmly believe that excellent design will last longer than fast-lived fashion trends and provide investment security. And at the Manufaktur, we can also supply customised hansgrohe products and special solutions.

<http://pro.hansgrohe.de/manufaktur>

SERVICE

Focus on customer satisfaction: our aim is that you should have just as much enjoyment with the installation of our products and your customers with using them as we do developing them. We base our developments on the customer, and therefore are constantly addressing their requirements. This modern ingenuity combined with our traditional know-how creates the foundation for a company whose success will continue far into the future.

Impulses for the industry: at hansgrohe around 30% of our turnover is achieved with new products that are not more than 3 years old. This high vitality index makes this Black Forest sanitary specialist one of the innovations leaders in this industry. Many of the things that have been thought up, developed and designed by hansgrohe have been extremely well received all over the globe. And as a Black Forest think tank, we can look back on very many innovations. Some of these ideas made sanitary history, not to say even cultural history.

For the sake of the environment: sustainability, environmental and climate protection are key features in everything hansgrohe does. Our worldwide conservation projects and our information work on the preservation of the resource water help to improve the ecology. We use renewable energies, efficient recycling systems and heat recovery in our production department in order to reduce CO₂ emissions. Choosing hansgrohe means choosing long-lasting quality and ecologically responsible production.

Technologies

Switches over to a different shower or spray type in moments, and provides pleasure at the touch of a button.

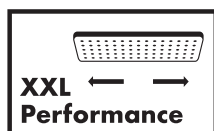

Reduces the flow rate to save water and energy. For long-lasting pleasure.

Combines water with a generous amount of air. For a soft, splash-free water spray and rich, full shower drops.

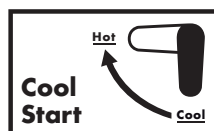

Limescale deposits are simply wiped away by rubbing a finger over the flexible silicone jets.

Distributes the water over the large spray face envelops the whole body in drops of well-being.

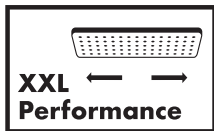

Defines the useable area between washstand and mixer. Something to suit every customer.

Cold water starts to flow when it is opened in the basic setting. You consume hot water only when you need it.

Spray modes

Rain spray over the entire area of the spray face for largescale showering pleasure.

Perfect for rinsing shampoo out of your hair.

The especially large spray face envelops your whole body with soft drops.

Gentle shower rain with air-enriched drops.

The ultra-soft drops are a delight for the skin and soul.

An intensive water spray that activates and refreshes.

The most powerful of all Rain sprays – for a refreshingly powerful showering experience.

The harmonious combination of gentle shower drops and dynamic spray.

A concentrated massage spray.

Provides fresh energy after a challenging day: The feel good, revitalising massage spray.

Strong, pulsating massage spray.

A flat, targeted jet for partly refreshing shower pleasure.

A powerful surge spray for the feeling of standing alone in a waterfall. Every day.

Parallel jets of large sparkling water drops right down to the floor for the same showering experience on all body sizes.

Unique showering experience thanks to the gently enveloping microdroplets.

Technology to thrill your customers

One click is all it takes to change the spray type or start or stop the water. The name of this innovative technology: Select. The Select button has different functions depending on where it is being used: change between shower spray types, select the thermostat function, and start and stop the water on mixers. Depending on the particular product, the Select buttons can even be started with the back of a hand or an elbow. This makes the technology perfect for all ages, and in particular for people with limited mobility.

ComfortZone

The right mixer for every washbasin

Whether you need more freedom of movement when washing your hands or filling large containers; the taller the mixer, the more flexibility you have in your daily dealings with water. We call this area between the mixer and the basin the ComfortZone. Hansgrohe has the perfect portfolio with a range of mixer heights that provide the right solution for every basin - whether free standing, wall-hanging, surface-mounted or built-in.

CoolStart

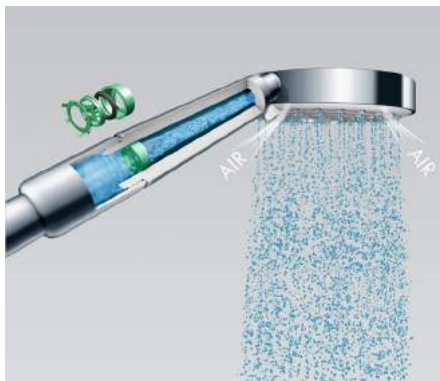

Cold water on the handle in the middle position

Cold water starts to flow when it is opened in the basic setting. You consume hot water only when you need it. CoolStart is the latest step on the way to maximum sustainability: as the mixer is turned on, only cold water flows. You do not consume hot water or the energy required for it until you actively turn it to the left. You will find this function as an option on our basin mixers and kitchen mixers.

Save water comfortably

Integrated invisibly in the product, the EcoSmart technology reduces the flow of water, thereby saving water and energy. For the sustainable use of water. Today, EcoSmart showers consume only nine or six litres per minute, and save up to 60 % water and energy. EcoSmart can also save a lot of water for everyday routines in the bathroom. Thanks to this technology, we were able to reduce the consumption of our basin mixers to only five litres a minute as standard.

AirPower

More fun from less water

The AirPower technology mixes large quantities of air in the water. For a soft, splash-free water spray and rich, full shower drops. Generous amounts of air are drawn in through the spray face. This quite literally stirs up the in-flowing water. The resulting airenriched drops are fuller, lighter and softer. This not only feels good, but it also means that you are making the most efficient and splash-free use of your precious water. Your AirPower mixer combines the flowing water with air. The water spray therefore splashes less and is very pleasant to use.

QuickClean

Fast anti-limescale function

The practical QuickClean technology lets you quite simply rub away limescale effortlessly with your finger. The aerators in our bathroom and kitchen mixers have been fitted with flexible silicone slats, making it even easier to clean them. All our showers have flexible silicone jets. Any deposits are quickly removed simply by rubbing a finger over them. Well looked-after limescale-free products not only look much nicer, they work better and last longer.

Peak performance followed by deep relaxation

Experience the loveliest moments with water with hansgrohe. Water, that most precious element, is inextricably associated with sports. hansgrohe helps with focusing on the next challenge, and after a tough, challenging day offers relaxation under the shower: motivation and reward when showering are greatly appreciated by top athletes who perform at their very best on a daily basis. hansgrohe is

therefore the official title sponsor for the first-class cycling team BORA-hansgrohe: a sport that is particularly dynamic and innovative, and delights the masses just as much as hansgrohe products do in the bathroom and kitchen. To find out where and when you can see our cyclists in action, go to **www.bora-hansgrohe.com** or follow them on the team app and on social media for daily updates:

Metris

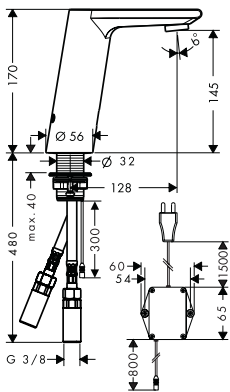

Electronic basin mixer with temperature control mains connection 230 V

- ComfortZone 130
- projection 129 mm
- flow rate: 5 l/min
- theft-proof aerator
- temperature limitation adjustable
- temperature adjustable via mixer lever on the side
- suitable for continous flow water heaters
- infrared sensor technology
- automatic environmental adjustment of infrared sensor
- adjustable optical range of infrared sensor (2 settings)
- 230 V / 50 Hz mains connection
- hygiene rinse activatable (automatic water flow for 10 seconds every 24 hours following the last operation)
- permanent rinse activatable (single water flow for 180 seconds, suitable for thermal disinfection)
- manual water stop for washbasin cleaning
- performance may be impaired if the sensor is obscured by the design of the wash basin, or when the wash basin is oversized and the distance between sensor and the wash basin edge is larger than 75 mm
- functional restriction due to too large distance
- connection dimension: DN15
- TÜV certified
- scope of supply: with two filter units with fine filter to protect from incoming dirt, for assembly on existing angle valves. Filter element can be removed and cleaned, non-return valve
- dirt filters in the connection hoses

This image shows a full page of blank, lined paper. It features approximately 28 horizontal gray lines spaced evenly across the page, typical of notebook or legal stationery. The lines are thin and light gray, set against a plain white background. There are no margins, text, or other markings present.
