Life is waterful.

Kitchen ideas that inspire

hansgrohe.com

Life is waterful.

With passion and precision, we design kitchen solutions that make your use of water particularly efficient and pleasant. For us, the kitchen is much more than just a functional space - it is the hub of everyday life, where smooth, easy workflows and efficient use of water go hand in hand. A place where you can live out your creativity and experience the comfort and inspiring lightness of water every day anew. The kitchen becomes a space that enriches your life and creates and creates special moments again and again.

Our principles – your enjoyment

Driven by innovation

hansgrohe has been a pioneer and innovation leader in the sanitation industry since day one. We constantly push the limits of what is technically feasible, revolutionizing kitchen mixers and sinks in the process. Not only do we optimize designs and materials, but we also continually rethink functionality by addressing our customers' evolving needs. Innovative spray types and intuitive controls are just a few examples. With our inventions, we encourage people to experience and enjoy the beauty of water.

Design – developing excellence

For us, modern design is more than just an appealing aesthetic. hansgrohe design combines timeless beauty, functional finesse, and the highest hand-crafted quality across all product ranges. With over 800 awards for the Hansgrohe Group – including several coveted iF Gold Awards – our pursuit of the extraordinary is clear and highlights our close collaboration with the design studio PHOENIX.

Quality – the highest standards for the longest product life

Our products stay with people for years. They create feel-good moments tailored to individual needs. The premium quality of our products is measured not only by their material properties, but also by the lasting joy they provide. We ensure customer satisfaction worldwide – through user-friendly design, a voluntary five-year* manufacturer's guarantee, and a Service Center that addresses all technical concerns. That's why many consumers become lifelong hansgrohe customers.

* Find out more about the manufacturer's guarantee.

Responsibility – take over and act

Our ambition is to offer our water-bearing hansgrohe and AXOR product portfolios[1] with water- or energy-saving technologies[2] by 2030. Specifically, this means that for the product lines in our water-bearing product portfolio, we will offer water- and/or energy-saving alternatives that combine efficiency with water experience and reduce water and/or energy consumption during use.

Find out more about water- and energy-saving technologies.

[1] Our relevant water-bearing product portfolio includes hand and overhead shower, shower sets, shower combinations, showerpipes, and washbasin and kitchen mixers.
[2] Products with built-in water- or energy-saving technologies such as EcoSmart, EcoSmart+, CoolStart, EcoSelection, or SensorActivation.

Making food preparation a pleasure

The kitchen is the heart of your home – the place where you most need comfort, design and efficiency. That's why we're always developing new ideas to improve your space. Our sophisticated technology and ergonomic solutions make your work in the kitchen easier than ever.

Welcome to the ComfortZone

Whether high, swivelling or extendable – with ComfortZone you have more freedom of movement and space. The ability to swivel the spout is especially practical, making switching between different sinks or washing different items easier than ever.

Your workflow made easy

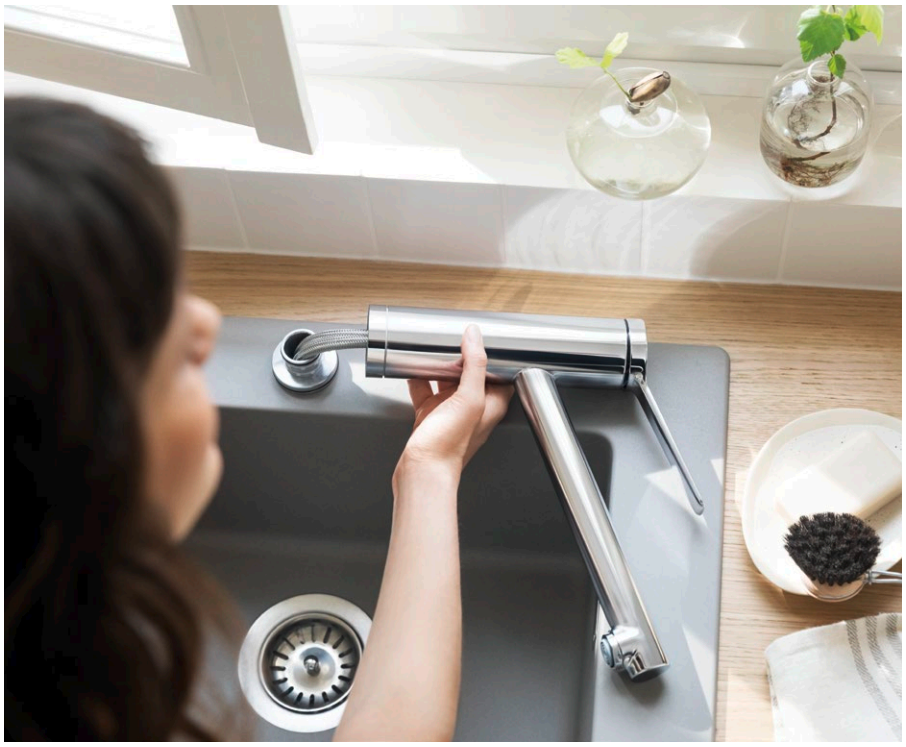

For hansgrohe taps with pull-out functionality, the innovative sBox keeps things neat around your sink. The hose slides smoothly and quietly back into the sBox, which is inconspicuously installed under the sink. This allows the tap to be extended up to 76cm, extending the working radius of your sink beyond the standard 50cm, and allowing for easy filling of large containers and plant watering. It's efficient multitasking at its best.

Technologies that inspire

The best products are the ones that enrich people's lives – and sometimes, it is the smallest technologies that make the difference. There's Select technology, which is just one button that brings a whole new ease of use to your home. Or QuickClean, a clever and time-saving anti-limescale solution. hansgrohe technologies make your kitchen more enjoyable to use and easier to clean.

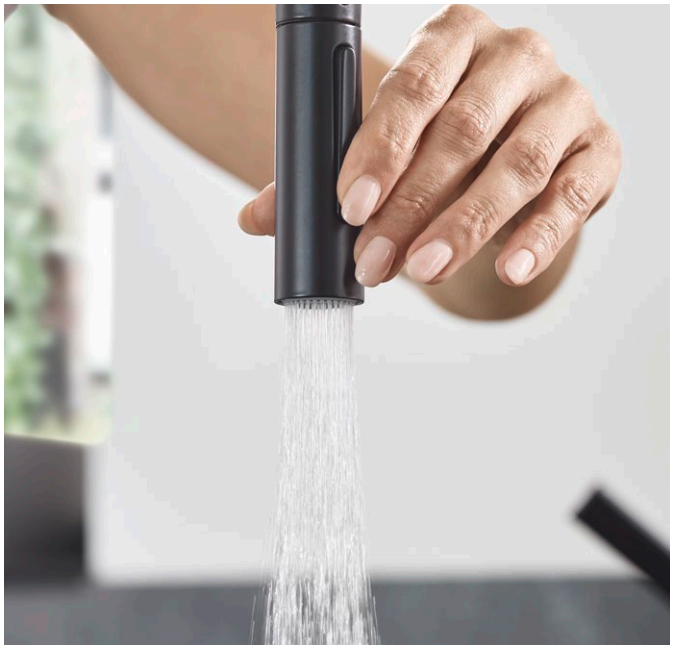

Adaptable to every situation

With kitchen windows that open inwards, conventional taps often get in the way. A hansgrohe tap with TiltFunction solves this problem. It can be easily lifted and lowered, so that the window can be opened and shut easily.

Low pressure solutions

Kitchen taps equipped with LowPressure technology can be used at sinks with a water pressure of just 0.2 bar. A low pressure fitting for cold water pipes with boiler/heat storage.

The right tool for the job

From filling a vase to washing delicate fruit, there are a lot of different tasks that are performed at the sink. That is why we offer taps with a variety of different spray types, so you can switch to the right choice for the right task quickly and easily.

Laminar spray
Crystal-clear spray for the sink with no air mixed in, perfect for quickly filling containers.

Normal spray
Full spray enriched with air that feels lovely and helps with all sink-based routines.

Shower spray
Efficient kitchen spray that can also be used to quickly rinse food.

SatinFlow spray
Flat, super-soft spray that does not splash and is highly efficient.

PowderSpray
Wide, microfine, low-splash spray mode that gently cleans and helps people to use water efficiently.

FinishPlus – all eyes on the high-quality sink

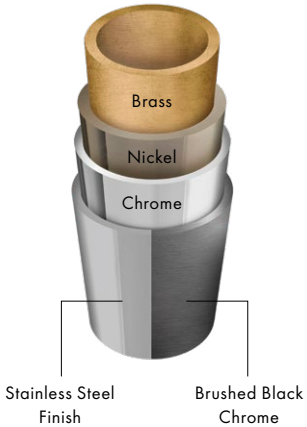

Kitchen design is all about unique style. You can go wild with vibrant colours with the FinishPlus surface finishes from hansgrohe. High-quality metallic shades and modern matt hues are all you need for personal fulfilment. The kitchen can be designed using colours to suit personal taste.

- High-quality finishes provide a variety of design options.
- FinishPlus creates elegant accents and enhances the style of the room. The metallic surface finishes and trendy matt colours find unique ways to bring kitchens to life.
- Relevant complementary products are also available in the same FinishPlus surface finish colours.

PVD coating

A PVD coating is vapourised molecule by molecule in the vacuum coating process to create a robust finish with a vibrant colour

The durability has been tested, resulting in a surface finish that lasts for years

Lacquer coating

A specialised lacquer is applied in several steps to create a bold and intense surface finish

The durability has been tested, resulting in a surface finish that lasts for years

Matt Black
Getting back to basics with black and white contrasts.

Brushed Black Chrome
A dark surface creates a sophisticated aesthetic.

Chrome
Timeless classic paired with dainty elegance.

Stainless Steel Finish
Harmony and a clear aesthetic.

Minimalist design, maximum choice

At a glance:

- Resistant to abrasive substances such as fruit acids
- Rustproof, heat resistant and hygienic
- Additional reinforcement bracket ensures tap stability
- Different sink sizes guarantees maximum flexibility
- Three installation options: surface-mounted, flush-mounted and under-mounted
- Smooth corners for easy cleaning

High quality and robust

These 1 mm thick, hand-welded stainless steel sinks shine with high quality workmanship, boasting precisely manufactured edges and 10 mm corner radii. The frame on the L version is 2 mm reinforced, ensuring complete sink stability. Stainless steel is robust enough to withstand contact with corrosive substances such as fruit acid.

Stable and easy to install

All sinks are equipped with a reinforcement bracket and double the material thickness. This ensures a stable tap fixture and no sink movement.

Heat resistant

Stainless steel is unaffected by extreme temperature changes and is completely rustproof.

S51

Natural perfection

At a glance:

- Resistant to abrasive substances such as fruit acids
- Heat resistant and hygienic
- Colour is resistant to food stains
- SilicaTec is made up of quartz particles, which offer impact, fracture and scratch resistance
- The water repelling effect allows water to drain off almost residue-free
- Thanks to different colour options, you can be even more creative in the kitchen
- Different sink sizes guarantees maximum flexibility
- Different installation options: surface- and under-mounted

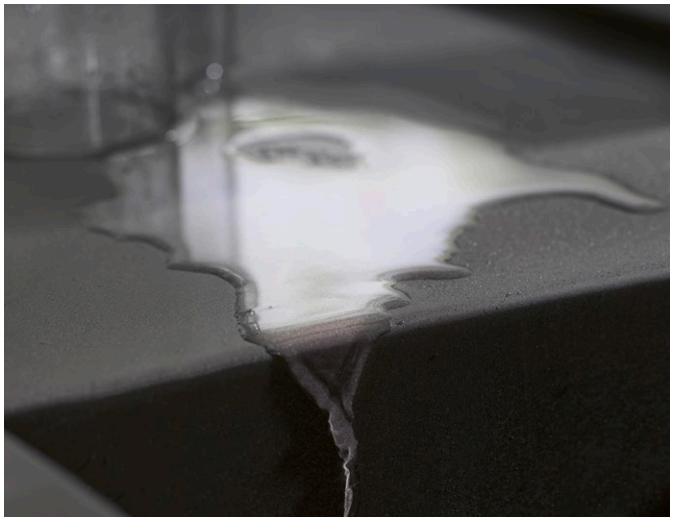

Natural

Whether in graphite black, stone grey or concrete grey, the material feels tactile and natural to touch. The smooth, pore-free surface prevents water from penetrating and dirt from sticking.

Resistant

SilicaTec is made up of quartz particles, which offer impact, fracture and scratch resistance. It is unaffected by heat and won't fade in the light, ensuring the colour remains true for many years to come.

Water repelling effect

The water repelling effect allows water to drain off almost residue-free. The quality of the material also prevents food stains and other discolouration.

KARLSSON

Aquno Select M81

Perfecting your workflow
in the kitchen

Find your flow

A good chef knows that it's the highest quality ingredients that make a perfect meal. We believe that begins with food preparation. That's why we have developed Aquno Select M81, for gentle food cleaning in your kitchen.

The unique design of the Aquno Select M81 kitchen tap means water flows in a new way. The flat SatinFlow stream gently cleans your food and doesn't splash when cleaning large items. Together with the tailor-made sieve, it perfects your kitchen workflow.

Aquno Select M81 makes everything you do at the sink easier. Three different spray types makes this is a versatile kitchen all-rounder. You can focus on the cooking, while the Aquno Select M81 acts as the ultimate kitchen assistant.

At a glance:

- Tailored to the exact dimensions of the splash-free SatinFlow spray, the included multifunction sieve helps you conveniently clean and drain food, hygienically avoiding contact with the sink. The hands-free operation means you can get to work on the next step of meal prep.
- Combined with the sBox, the operating range is extended up to 76 cm
- Select technology makes using the kitchen tap easier than ever before, allowing you to turn water on or off with one click. Operate it with your elbow or even the back of your hand, and keep your taps clean when you're cooking or washing up.
- Swivel range adjustable to 60°, 110° or 150°
- Available in three surfaces: chrome, matte black and stainless steel

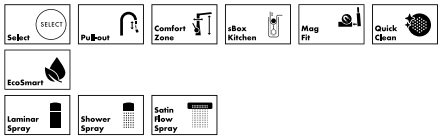

SatinFlow spray – gentle preparation begins with a 20 °C shower

Multitasking with the multifunction sieve: Tailored to the exact dimensions of the splash-free SatinFlow spray, the included multifunction sieve helps you conveniently clean and drain food, hygienically avoiding contact with the sink. The hands-free operation means you can get to work on the next step of meal prep.

Metris Select M71

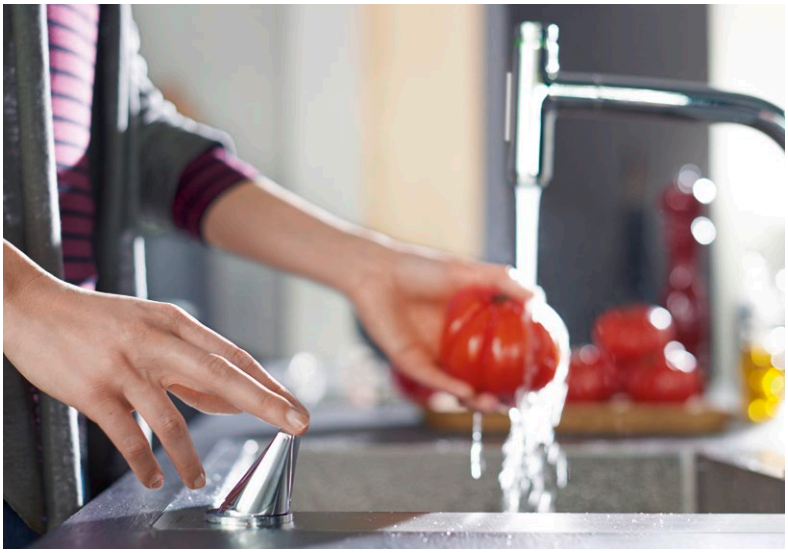

A recipe for easy operation

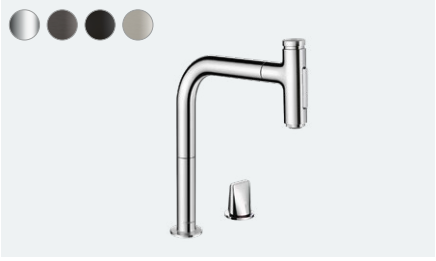

At a glance:

- Pull-out function provides excellent flexibility
- The sBox ensures that the hose extends quietly and smoothly from the base cabinet up to 76cm
- The Select button lets you start and stop water flow quickly and conveniently
- Several spray types available
- ComfortZone provides plenty of space between the sink and the tap, for fewer water splashes
- Easy window opening when installed in front – simply remove it from the holder and lower it down

Convenient operation

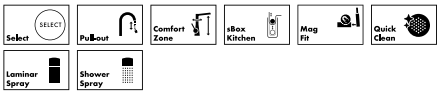

With Select technology and a rocker lever positioned at the front edge of the sink, the kitchen tap can be conveniently operated without reaching across the flow of water. By turning the ergonomic rocker lever you can control the water temperature, while tilting it allows you to control the volume of the water flow.

Talis Select M54

Reinventing kitchen workflows

At a glance:

- PowderSpray, wide, microfine, low-splash spray mode that gently cleans
- Flexible shower hose that simplifies workflows around the sink
- Thanks to different colour options, you can be even more creative in the kitchen
- Several spray types available
- ComfortZone provides plenty of space between the sink and the tap, for fewer water splashes

Gentle yet impressive

The swivel spout houses the innovative PowderSpray, so it's much more than just a decorative element. This unique spray mode lets you deep-clean your fruits and vegetables making food preparation a breeze, and allows for convenient handwashing – all without lots of annoying splashing. The gentle flow of water through delicate micro jets elevates everyday kitchen tasks to a delightful experience.

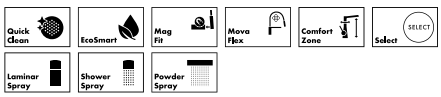

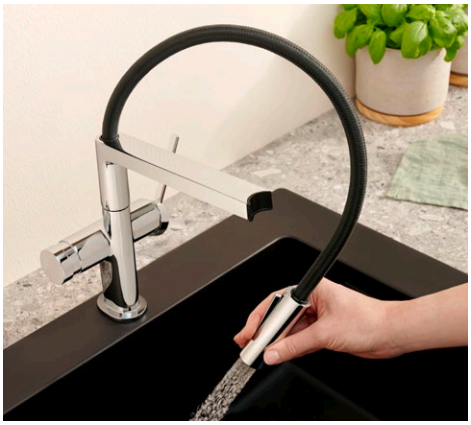

Convenient operation

By pressing the Select button, you can seamlessly switch to front spray– and switch back to the swivel spout with PowderSpray seamlessly. The flexible textile hose enables efficient work in the sink. For maximum stability, the MagFit magnetic holder securely holds the front spray hose in place and ensures that it remains securely fixed in its original position.

Aqittura M91

For the perfect flow in life

Uncompromising indulgence with water

Water is arguably our most vital resource on Earth. If you have delicious drinking water, you get to enjoy a much better quality of life. We have developed the Aqittura M91, the exclusive tap with an integrated system that gives you delicious water, refined to your unique taste, directly from your tap. So you can eliminate the transport of water bottles and reduce your use of single-use water bottles.

Specific filtration for care-free water consumption

The filtration in the Aqittura M91 system can reduce up to 95%* of certain pollutants, heavy metals, pesticides and insecticides. The activated carbon filter also filters out microplastic particles from the drinking water. To ensure you can enjoy your water without any worries, organic substances that can affect its smell and taste are also reduced.

The tap is designed with two outlets for the separate supply of filtered and unfiltered water.

*Average of seven typical harmful substances (pesticides and drug residues), calculated by the Zurich University of Applied Sciences (ZHAW)

Find the perfect system for you

The Aqittura M91 is available in two systems. With the Aqittura M91 SodaSystem, you get all the benefits: Not only can you enjoy your water filtered and mineralised, but also carbonated to your taste as sparkling, medium or still and cooled to between 4 and 12 °C. The level of carbon dioxide added to the water can be set at the touch of a button on the tap itself. The system can also be controlled via the hansgrohe home app. If you can do without cold, carbonated water and just want the water to be filtered and enriched with minerals, the Aqittura M91 FilterSystem is the perfect choice for you.

The **FilterSystem** provides filtered or mineral water at the touch of a button. The integrated valve ensures the purified water flows for as long as the button remains pressed. The mineralisation filter is also easy to install in the sink base unit thanks to its space-saving bracket.

You can use the **SodaSystem's** intuitive control element to choose how you want to enjoy your water: sparkling, medium, still. The SodaBase in the sink base unit features a CO_2 cartridge, the mineralisation filter, the storage tank for purified water, and the cooling unit.

Mineralisation to suit individual tastes

MINTEC® filtration and mineralisation technology makes it possible to enrich filtered water with selected minerals. Depending on the setting chosen, mineral salts such as magnesium, calcium, potassium and sodium are added to the water.

Harmony

The Harmony mineralisation filter enriches tap water with magnesium and potassium. This gives the water a harmoniously balanced mineral content, with magnesium and potassium complementing its natural mineral composition. For water with a balanced mineral content that naturally becomes part of your daily drinking routine.

Life

The Life mineralisation filter enriches very soft water with calcium, magnesium and potassium. The combination of these three minerals ensures balanced mineralisation and supplements the mineral composition of the water. This makes mineralised water a daily companion.

Sport

The Sport mineralisation filter enriches tap water with sodium, potassium and magnesium. The balanced combination of these three minerals complements the mineral composition of the water. The result is mineralised drinking water that fits naturally into an active lifestyle.

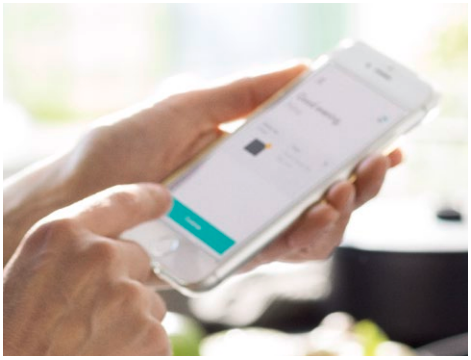

SodaBase – the heart of the Aqittura M91 SodaSystem

All the functionality in the smallest space: With a height of 476 mm, width of 200 mm and depth of 500 mm, the SodaBase fits in any kitchen cabinet with a width of at least 400 mm. There is a swivel fitting with a threaded connection in the SodaBase so that all standard CO_2 bottles from different manufacturers can be connected in a few simple steps without the use of tools.

Discover all the benefits with the hansgrohe home app

With the Aqittura M91 SodaSystem, you can take advantage of all the digital technology of our kitchen innovation. Operate the smart kitchen tap wherever you are and enjoy so many convenient features in the hansgrohe home app.

- Easy to operate via your smartphone
- Digital filter & CO_2 level indicator
- Notification to the app user: capacity levels, cleaning, software updates, error messages
- Stock up on filters and other spare parts via specialist retailers or the usual online shops
- Learn more: Operating instructions are available on the app and in the FAQs

hansgrohe

GET IT ON Google Play

Download on the App Store

At a glance:

- Tailored: purified water for all tastes with WaterRefinement Plus
- Convenient: Purified drinking water comes straight out of the tap. No buying, carrying or storage necessary
- Enhanced: Filters with mineralisation (Harmony, Life, Sport), without mineralisation (activated carbon filter) or for hard water regions (ion exchanger and activated carbon filter)
- Varied: sparkling, medium, and still water that can be cooled to between 4 and 12 °C
- Safe: Two outlets for purified and standard tap water
- Plastic is reduced as bottles are not required. This also eliminates unnecessary transportation. The CO_2 bottles are also reusable

Equipment & Accessories

Maximum functionality, for a more comfortable workflow

Multifunction sieve

Multitasking in the kitchen is made easier thanks to the multifunction sieve, designed to move smoothly along the S51 and S71 sinks and those with a depth of 400-406 mm. Its use with undermounted sinks depends on the installation.

Chopping board

The solid oak or walnut chopping board features a guide edge that allows you to slide it along hansgrohe sinks.

Dishwashing liquid/ lotion dispenser

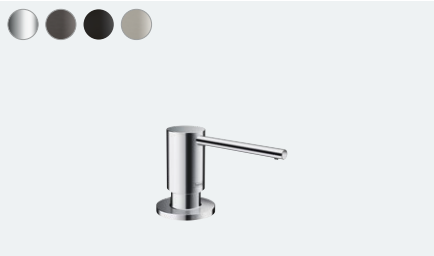

This practical dispenser is available in three different designs and two different finishes, ensuring it coordinates perfectly with any hansgrohe kitchen tap.

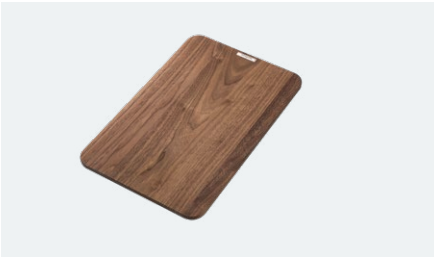

A71 Soap-/lotion dispenser

Technologies

Start the water, stop the water: One push of a button is all it takes to control the water flow at the sink.

A touch of a button is all it takes for purified water to flow from the tap as still, medium or sparkling.

Filtered or mineral water flows from this user-friendly kitchen tap at the touch of a button.

Ensures maximum room to move at the sink, both in terms of height and the ability to swivel from side to side.

Smooth and protected hose guidance. The pull-out spray can be extended to max. 76 cm.

The compact solution for smooth and safe hose handling. Suitable for any kitchen base unit.

Limescale deposits and dirt can be simply rubbed off using a finger, creating less of a need to clean.

In the first lever position (Eco), the flow rate is reduced by around 50 %, and full flow is reached at maximum opening.

Tap that uses just 6 l/min and thus helps reduce water thanks to a flow limiter without compromising comfort.

Mixes water with air. For a smooth, lower-splash water spray and light yet full shower droplets.

Mixer that helps to save energy by only allowing hot water to flow when the lever is actively moved.

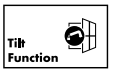

A pull-out spray or spout enormously expands the operating radius at the sink.

The shower hose gently swivels back after use and is held in place by magnets at the front of the mixer.

A helper that simplifies workflows at the sink, offers flexibility, and makes cleaning the sink so easy.

Sink in front of the window? This kitchen tap can be easily removed from its holder and placed on its side.

Low-pressure technology enables use at pressures as low as 0.2 bar. Suitable for boilers/heat exchangers.

Separate pipelines for purified and standard tap water provide reassurance when pouring.

This can be used to accurately fill various drinking vessels. The water flow stops automatically.

The app provides important information about the kitchen tap, such as capacity levels and more.

Spray modes

Crystal-clear spray for the sink with no air mixed in, perfect for quickly filling containers.

Full spray enriched with air that feels lovely and helps with all sink-based routines.

Efficient kitchen spray that can also be used to quickly rinse food.

Flat, super-soft spray that does not splash and is highly efficient.

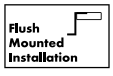

Wide, microfine, low-splash spray mode that gently cleans and helps people to use water efficiently.

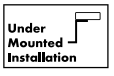

Sink installation options

Surface-mounted installation: The sink is inserted from above into a cut-out in the worktop.

Flush-mounted installation: The sink is installed flush with the worktop to create a smooth transition between worktop and sink.

Under-mounted installation: The sink is mounted below the cut-out and is therefore almost invisible, making the kitchen look more spacious.
