Design, Quality and Function Perfectly Combined in hansgrohe Washbasins and Toilets

Timeless Design Statements from Sanitary Ceramics

Copyright: hansgrohe/Hansgrohe SE

Iconic shapes meet high functionality. With three design collections in the area of washbasins, and a toilet line, hansgrohe delivers optimal solutions for the personal place of well-being - the bathroom.

Xelu Q, Xevolos E, Xuniva - behind each of these names lies a washbasin collection, whose shape and appearance underscore the individual character of the customer. Together with the furniture innovations by Hansgrohe, the washbasins form a harmonious unit both visually and functionally.

The basins are made of durable sanitary ceramics. For Xelu Q and Xevolos E washbasins, this has been sealed with the dirt repellent Hansgrohe Smart Clean glaze. This glaze is also optionally available for Xuniva models. The entire Hansgrohe washbasin range is specified in compliance with standards.

For even more convenience in bathroom planning and daily use of the washbasins, hansgrohe has pre-tested a wide range of possible combinations of its basins and taps for compatibility. The Comfort Zone test examines a wide variety of applications: for example, the splashing behaviour of the water when washing hands with various hansgrohe taps. Only optimally matching product combinations receive the Hansgrohe Excellent Fit rating and serve as a valuable guide for the customer when making a purchase decision.

The new hansgrohe Xelu Q and Xevolos E furniture collections, as well as the Xarita mirror complete the wash place in a unique way. Furthermore, the dream bathroom looks as if it has been cast from a single mould with the perfectly shaped hansgrohe EluPura toilet range. All washbasins, furniture and toilets are packaged plastic-free and support a sustainable lifestyle thanks to their durability and largely natural and recyclable materials.

Hansgrohe Xelu Q – harmonious form

Soft Cube is what hansgrohe calls the rounded design language of the Xelu Q washbasin collection. This continues through to the Xelu furniture collection, which is functionally coordinated with the washbasins.

With its spacious inner basin, this is the all-rounder for the family bathroom. The ceramic drain cap and the interior basin without overflow hole emphasise the continuous, pleasing design. The spacious basin mixer hole bench provides a large storage area for bathroom utensils, simplifying daily routines. For even more space, the 800mm Xelu Q washbasin is available with optional side shelf (on the left or right).

With nine models in six different sizes (with and without tap holes), Xelu Q offers the right solution for almost every wash place. The scope of delivery includes a custom-cut sound-absorbing mat.

Hansgrohe Xevolos E – sophisticated design

Clarity and straight lines characterise the design language of the Xevolos E washbasins. This design principle is consistently implemented right down to the flush-integrated ceramic waste cap. The generously designed inner basin offers enough space for daily care routines, whilst products can be stored the large tap hole bench.

For easy cleaning, Xevolos E washbasins are available in the standard variation without an overflow hole, whilst the Smart Clean glaze has a dirt-repellent effect, making cleaning easier.

For the guest bathroom, the straight-lined Xevolos E washbasins are available in 360mm and 500mm. Variations without a tap hole are available in sizes from 500 to 1200mm. Xevolos E double washbasins with

two basin mixer holes are offered in widths of 1000 and 1200mm. All Xevolos E washbasins are also supplied with a custom-cut sound-absorbing mat.

Hansgrohe Xuniva – a beautifully designed all-rounder

Maximum design freedom in terms of shape and installation is offered by hansgrohe Xuniva washbasins. The high-quality ceramic washbasins are available in four geometric shapes - from round to oval and *Racetrack* to *Soft Cube*.

In combination with the three selectable installation types (countertop washbasin, built-in washbasin, below counter washbasin) and additional variations with or without tap hole, the product line offers almost unlimited design possibilities. Xuniva countertop washbasins can be combined with Hansgrohe Xelu Q furniture with console. Optionally, all washbasin solutions in the collection can be finished with the stain-resistant Smart Clean glaze.

Hansgrohe EluPura – hygienic purism

Thanks to its universal design, the hansgrohe EluPura toilet range blends seamlessly into the dream bathroom. Visually, the toilets harmonise with all hansgrohe washbasin collections thanks to high-quality details such as the concealed wall mounting. Available in a choice of *Soft Cube* or round shapes, the toilet range is also impressive in terms of comfort and function. Both designs are optionally available with quick-release toilet seats and soft-closing mechanisms, whilst the optimised interior geometry can achieve outstanding flushing results with just 4.5 litres per flush¹.

The rimless design ensures even greater cleanliness and even easier cleaning. The Hygiene Effect glaze prevents bacteria from multiplying on the product², and the stain-resistant Smart Clean glaze familiar from the washbasins is also available. EluPura offers even more convenience in the rimless product variant with whisper-quiet and highly efficient Aqua Helix flushing technology. The pre-installed and easy-to-use mounting system and the custom-cut sound insulation mat makes installation straightforward.

¹ Suitable rinsing tank required.

² Refers to the following bacteria only: *Escherichia coli* ATCC8739 and *Salmonella enterica* ATCC 13076 (test performed in accordance with ISO 22196: 2011-08).

Soft Cube is what hansgrohe calls the rounded shape of the Xelu Q washbasin collection. This design language also runs through the furniture collection of the same name, which is functionally coordinated with the washbasins. Whether bathing children or washing their hair - Xelu Q by Hansgrohe is the easy-care all-rounder for the family bathroom.
