With RainSelect, hansgrohe is introducing an intuitive and convenient control unit for feel-good overhead showers, featuring a selection of spray modes. Thanks to its minimal installation thickness, the RainSelect shower control unit opens up space for more freedom of movement in the shower.

*Singapore, May 2018.* The trend towards spacious, relaxing shower areas continues. Multi-jet overhead showers are a frequent feature and provide a fun and diverse shower experience. With RainSelect, hansgrohe is introducing an intuitive and convenient control unit for overhead

showers with adjustable spray modes. This panel controls all functions in one unit, and its aesthetically sophisticated design, and linear, horizontal shape make it a striking addition to the bathroom. Its unique, sleek silhouette, which gives the wall a clean and uncluttered look, was developed in collaboration with Phoenix Design. Moreover, thanks to its minimal installation thickness, the RainSelect shower control unit opens up space for more freedom of movement in the shower. The exterior features quality materials such as metal or glass, depending on the finish, and a metal rim that frames the control panel and emphasises its horizontal design.

### **Convenient and individual control centre**

Generous, 70 x 70 millimetre switches make selecting shower settings a tactile experience. Operating them is similar to operating a light switch. Underlying this is hansgrohe's Select technology, which controls the various functions on a purely mechanical basis. In addition to the switches for the various shower functions, two elegant dials control water volume and water temperature. A porter unit for the handheld showerhead and a hose connection are also part of the control centre. This makes RainSelect a clever product solution, rendering additional products and drilling unnecessary. There are two models to choose from for the shower area, and a separate solution for bathtub showers. An insulated, watertight and soundproofed base set is available for use with all RainSelect sets. Moreover, quality materials and reliable mechanics ensure long lasting functionality.

Three surface finishes enable customised and consistent bathroom design: white- or black-backed glass, or the more traditional chrome-coloured metal. The convenient RainSelect shower control centre can be combined with overhead showers such as the Rainmaker Select and other models that share the same design language and materials for a harmonious overall look and a comfortable and relaxing shower experience.

As part of the internationally active Hansgrohe Group, hansgrohe is the premium brand for showers, shower systems, bathroom and kitchen taps, as well as kitchen sinks. With its many award-winning products, hansgrohe shapes the flow of water in the kitchen and the bathroom. Because this is where people spend the time they treasure most and experience precious moments in the interaction with water. With these moments in mind, hansgrohe develops ground-breaking solutions that unite extraordinary design, long-lasting quality and intelligent features for maximum ease of use. hansgrohe turns water into an impressive experience:

**hansgrohe. Meet the beauty of water.**
