

# Rebris

Product & price guide 2022

# Introducing Rebris

Hansgrohe concepts help make life in the bathroom better, easier and more beautiful. Innovative but brilliantly simple, ultra-reliable technology creates timeless and sophisticated products. The philosophy of design at the heart of everything we do has been recognised with over 600 design awards. Our focus on sustainability and environmental protection is reflected in water-saving products and eco-friendly production technologies.

## The Rebris tap is ultra-versatile with many features

- The designs are timeless and can blend in harmoniously anywhere in the bathroom where water is enjoyed
- Both are available in a choice of chrome or matt black
- Reliable and high quality Rebris taps are available at an attractive price point
- Rebris makes maintenance easy. The Coin Slot spray regulator can simply be turned using a coin and reinserted once descaling is complete.
- Rebris supports sustainable lifestyles with its innovative technologies. EcoSmart+ requires 20% less water compared to our standard EcoSmart products, while CoolStart helps you to save energy

## Our name is your guarantee

'Made by Hansgrohe' is your assurance of quality, backed by our five-year guarantee for repair, replacement or refund if ever any of our products fail to fulfil the high expectations that first attracted you to the Hansgrohe name.

**5** YEAR  
PRODUCT  
GUARANTEE

All products carry a minimum 5 year manufacturing guarantee inc. parts and labour.

**15** YEAR  
PARTS AVAILABILITY  
GUARANTEE

Spare parts held for 15 years after product discontinuation.

**Trade Helpline: 01372 472077**

# Rebris: innovative and functional

The new hansgrohe Rebris assortment consists of two design variants – S and E. The Rebris S is pleasing to the eye with its smooth curves, whereas the Rebris E stands out with its clear-cut lines.

## Rebris S

The Rebris S: the soft silhouette that fits in with many bathroom styles

## Rebris E

The Rebris E: linear design for modern bathroom styles with clean edges

# CoolStart. Saving energy at home couldn't be easier

## As simple as it is ingenious

Where can we save energy, how do we reduce CO<sub>2</sub> emissions and what can we do to combat climate change? These are questions many of us are asking. One of the best ways to lower our energy consumption in the home is look at the ways we use it several times a day. For example, our basin taps. With CoolStart, water is only heated when you actually need it. Only cold water will flow when the handle is raised in the middle position. The result? Fewer resources consumed, lower CO<sub>2</sub> emissions, lower costs. Good for the environment and for your wallet!

## Get a handle on saving costs with CoolStart

- With standard taps water-heating starts whenever the lever is raised in the middle position
- With CoolStart, only cold water flows when the handle is raised in the middle position
- Only use energy when the lever handle is turned to the left
- Cold water is often all we need for drinking water, brushing teeth or watering flowers
- Reduce your hot or warm water costs on a day-to-day basis
- A CoolStart tap could pay for itself in less than two years

## Technologies

Our innovative technologies are all about performance. The technology and spray pattern icons throughout this brochure are designed to assist you to navigate our comprehensive product range.

Enriching water with air produces plump droplets for a velvety touch on the skin.

Mixers and showers use up to 60% less water than conventional products.

Defines the space between the wash basin and mixer. The larger the ComfortZone, the greater the variety of uses.

### Easy maintenance

The Coin Slot spray regulator can simply be turned using a coin and reinserted once descaling is complete.
