

A man is shown from the chest up, standing under a large, white, rain-style showerhead. He has his eyes closed and a relaxed expression, with his arms raised behind his head. Water is spraying down on him, creating a misty atmosphere. The background consists of grey, textured stone tiles. In the top right corner, there is a green rectangular box containing the brand name 'hansgrohe' in white lowercase letters.

# Spray Types

We've been around for long enough to know that not every showering experience is the same. Sometimes you need more than just a quick wash... sometimes, you need indulgent relaxation after a long, busy day. Your shower should be as unique as you. So, whether you need energising or soothing, Select Technology can deliver you the ideal experience at the touch of a button.

**NEW**

### **PowderRain**

Revolutionise your daily shower experience with PowderRain and transform your bathroom into an oasis of relaxation. Instead of only one jet outlet per nozzle, PowderRain has up to five openings that create thousands of fine and silky micro-droplets that envelope your body.

### **Intense PowderRain**

Intense jets of fine micro-droplets for sensational showering. Intense PowderRain is extraordinarily effective as the number of droplets has been substantially increased to produce an intense, yet velvety soft spray.

Simply scan the code and experience the spray patterns in the video.

### **Rain and Rain XL**

A powerful rain jet, with an invigorating burst of freshness for the entire body, ideal for rinsing out shampoo. This spray type is perfect for a stimulating start to the day, and to recharge your batteries.

### **RainAir and RainAir XL**

Relaxing shower rain, which is enriched with air inside the shower head. This makes the water feel exceptionally soft and plump, covering your body with soft beads of water and enveloping you to create a sense of well-being. It's a spray most loved by pleasure seekers.

### **IntenseRain**

It's not just shampoo you can rinse away with ease thanks to IntenseRain water spray. It's perfect for setting yourself up for the day too: wash morning tiredness down the drain - for a refreshing start to the day.

### Turbo Rain

The all-purpose tool for quick, straightforward results: TurboRain is the most powerful of our Rain spray modes and lives up to its name every time.

### Soft Rain

The gentle SoftRain water spray wraps itself around the body, treating your skin and your soul. The SoftRain spray comes into its own during a quick morning shower and during a long soak in the bath after a hard day.

### Mix

Simultaneously gentle and dynamic. The mix spray combines the rich, soft RainAir spray with the strong, revitalising CaresseAir spray. Soft drops envelop your body, while a warm jet massages the skin. It's a dream combination for daily showering pleasure.

### Whirl

A swirling massage spray, which showers away the stresses of the day. This relieves tension, primarily in the neck area and shoulders. The rotating helix jet wanders over the skin, just like a masseur's fingers. The ideal choice for relieving stress or giving yourself a spa-like treatment after playing sport.

### Caresse Air

Five strong single sprays combine in a pleasantly revitalising and powerful massage. It's just the thing for post-exercise or after a hard day at work – good as new in minutes.

### Massage

A concentrated spray that effortlessly washes the day's stress away. The targeted spray relaxes tense areas, while the innovative circular arrangement of the jets turns the shower into a mini-wellness treatment for your bathroom.

### Mono Rain

A targeted, soothing spray from the centre of the showerhead. The Mono jet's lightness helps you to unwind, making it a perfect spray for relaxing.

### Rain Flow

An overhead shower with beautifully shaped RainFlow that brings the experience of a waterfall to your bathroom. This is water in its natural form, falling from above onto your neck and shoulders.

### Rain Stream

The new single sparkling RainStream spray is a crowning achievement for the hansgrohe R&D team. These special overhead shower sprays remain revitalising and intense from head to toe, giving a consistent experience however tall you are.

All specified flow rates are based on an operating pressure of 0.3 MPa (3 bar).

## TECHNOLOGIES:

Simply regulates the water flow at the touch of a button: a convenient way to turn the shower on and off or switch between jet modes.

Reduces the flow rate to save water and energy for long-lasting pleasure.

Combines water with a generous amount of air. For a soft, splash-free water jet and rich, full shower drops.

Wipe limescale deposits away easily by rubbing your finger over the flexible silicone nubs.

Distributes the water over the large spray face enveloping the whole body in drops of well-being.

Defines the useable area between washstand and mixer. Something to suit every need.

Cold water starts to flow when it is opened in the basic setting. You consume hot water only when you need it.

Cools through the controlled flow of cold water to stop the product getting hot. For even safer showering.
