hansgrohe – the bathroom pioneer since 1901

In 1901, Hans Grohe founded his metalwork business. He was a visionary, recognising the changing role of the bathroom in the home (despite it being a fairly new concept to most at the time).

The Hansgrohe company has been shaping bathroom culture from day one. Founder Hans Grohe started out small in 1901, with a metal pressing workshop in Schiltach in the Black Forest. You can still find our innovative hub and corporate headquarters there today. These days, the hansgrohe brand has an international reputation for excellence. The people who work at hansgrohe are passionate about product refinement and water, and it's their expertise in engineering and their love of experimentation which really set us apart as a company. But our biggest appeal is the expertise and commitment of everyone who works here. The energy and drive to constantly craft and refine is reflected in all our products, from revolutionary bathroom innovations right through to pioneering water-saving technologies. These and other innovations will continue the hansgrohe brand's success story.

2001

iBox universal
The first and only basic set for all standard and thermostatic mixer solutions – a revolution in concealed installation.

RainTunes*
We combine water with sound, light, imagery and fragrance into one holistic wellness experience.

*RainTunes only available for certified partners.

EcoSmart+
Eco-friendly tap that consumes just 4 l/min at 3 bar. Less water, less energy consumption.

1928

Hand shower

The first hand shower with a white porcelain handle. This hangsrohe innovation makes showering affordable for many households for the first time.

1953

Unica shower rail

Thanks to this revolutionary idea, hand showers can be mounted at any height.

1974

Tribel

First design-award-winning hand shower in bright colours and with three spray types.

1987

EcoSmart

New technology in the Mistral Eco shower head that reduces water consumption by 50% at the time. This sets a milestone towards a sustainable future.

2003

Raindance

The first hand shower with an XXL shower head, flat silhouette and short handle. The all-rounder becomes a trendsetter.

2012

CoolStart

Energy-saving technology that only allows cold water to flow when the handle is in the middle position.

2018

PowderRain

Sensational showering with softly enveloping micro-droplets.

2019

FinishPlus

High-quality finishes provide a variety of design options.

2023

Pulsify Planet Edition

We can be part of the circular economy through the use of recycled and reusable materials.

2023

Dream bathrooms*

Expanding the range to include furniture, ceramics and mirrors - hansgrohe offers product solutions for a holistic bathroom experience.

*Only available for certified partners

2023

Green Vision

Concept study on the bathroom of the future featuring almost waterless regeneration.

Our values – your advantages

Pioneering

Intuitive operation, lower water and electricity bills or less need to clean: All factors that will leave your customers beaming from ear to ear. Build on pioneering innovation with excellent customer value. This is precisely what our experts in our research departments are working towards in the sound and spray laboratory, where they develop high-quality products with a certain je ne sais quoi. With beautiful surface finishes, energy-efficient spray types, built-in safety, and integrated indulgence.

With our innovations, the focus is not only on novelties but also on optimising existing products. The latest evolution of the iBox universal draws on years of experience with over eleven million installed products and continuous feedback from specialists and planners. As a result, the new **iBox universal 2** and the new pre-fab sets make installation twice as fast as it was with the previous model.

Award-winning products

Elegant functionality appeals to both the heart and mind, and it's something we specialise in. Our products are consistently award-winning, outlasting fads and instead providing long-lasting value, whether they are found in the home or in a world-famous hotel. Good design makes all the difference and always ensures an excellent experience. With over 30 years of collaboration with PHOENIX, hansgrohe is a **leader** within the industry, racking up more than **700 awards** for our design achievements.

Quality

Highest standards

Providing our customers with the highest quality at all times is a fundamental part of the hansgrohe company philosophy. We have been manufacturing high-quality bathroom and kitchen products for over 120 years, and we are proud of our extensive quality control processes, especially as many of our products go above and beyond the required standards.

We offer our consumers a voluntary **guarantee of 5 years*** plus guaranteed availability for 15 years.

** Only available in certain countries

Responsibility

Green. Greener. Eco* 2030

The aim of our sustainability strategy is to do what we can within our sphere of influence to conserve all the resources that are becoming increasingly scarce on Earth or whose consumption fuels global warming.

"By 2030, we plan to convert our entire water-bearing product range for the hansgrohe and AXOR brands to **water- and energy-saving technologies**. In future, they will need to be part of every energy-related renovation and every energy-efficient new build. We are dedicated to working with others to make the right emission-based changes in bathrooms and kitchens."

Hans Jürgen Kalmbach

Chairman of the Executive Board of Hansgrohe SE

Less water – pure joy

9 out of 10 customers agree:
Pulsify EcoSmart is a sensational
showering experience that uses
40% less water.*

* Source: TRND consumer survey with 150 testers, July 2022.
Water saved in comparison to the hansgrohe average.

The usage phase of our products offers the biggest CO₂e saving

Our research shows: The usage phase of a hand shower is by far the most CO₂e-intensive. This means around **1,000 times more CO₂e** is emitted when showering than during the manufacturing of the shower. We therefore plan to convert our entire portfolio of showers and taps to “ECO” by 2030. In specific terms, we are reducing the water and/or energy consumption of water-bearing products in usage by at least 22 percent (compared to 2020, the base year).

Production

Usage phase
approx. 99%
of the emitted
CO₂e

**Waste
disposal**

Life-cycle analysis of a hand
shower

Fitted with EcoSmart+, **Tectoris** reduces water consumption to just 4 l/min at 3 bar – without taking away any of the joy water brings. The CoolStart technology also helps users to save energy.

We are part of the circular economy

Pulsify Planet Edition

Planet Edition is all about conserving resources throughout the entire product life cycle. By using recycled materials*, we become part of the circular economy. All while maintaining the famous hansgrohe standard and demonstrating that waste is only waste if we treat it as such.

* Shower handle, WallStoris accessories, hose yarn

Transparent and fact-based

The relevant stakeholders see us as credible because we are transparent about our environmental impacts. For example, we contract independent parties to verify our environmental product declarations and we participate in company rankings.

Ecostat Fine | Ecostat Element

Sustainability

EcoSmart

This shower head uses up to 40% less water than our conventional showers. In this way, it reduces water and energy costs every day and conserves valuable resources. For long-lasting soothing showering pleasure.

EcoStop+

Consciously save valuable resources thanks to the EcoStop+ function. The water consumption of your thermostat is regulated to a maximum of 6 l/ min. If more water is needed, a higher water flow can be released by simply pressing the EcoStop+ button.

Water flow control

The amount of water can be precisely adjusted via a control dial on the water-saving thermostat control, enabling you to use less water every day. Ideal also for children, who usually prefer gentle flow of water anyway.

Technologies

PushSlider

Smooth and ergonomic: This shower support can be used to conveniently adjust the height of the hand shower on the shower rail. Simply press the button and smoothly slide the support. It's so easy, it can be done with one hand.

QuickClean

Who actually likes cleaning? Limescale deposits and dirt disappear in an instant with this technology. Simply rub the flexible silicone discs or nozzles with a finger. It's fast and keeps cleaning to a minimum.

QuickClean

Who actually likes cleaning? Limescale deposits and dirt disappear in an instant with this technology. Simply rub the flexible silicone discs or nozzles with a finger. It's fast and keeps cleaning to a minimum.

Technologies

Safety Stop

A temperature limitation that ensures safe showering pleasure at all times. The function prevents too hot water from coming out of the shower. The scald protection is a big safety plus, especially for children or people with restricted mobility.

Select

The Select push button simplifies daily bathroom routines, as one simple push is all it takes for water to flow or stop. When showering, the user-friendly button can change the spray type or switch from the overhead to the hand shower.

Thermostat

Safe and reliable: The thermostat with integrated temperature control continuously monitors the water temperature while showering or bathing. It reacts quickly to changes in pressure and keeps the temperature comfortably at a constant level. For pleasant water enjoyment at all times.

XXL Performance

XXL showering indulgence that envelops the complete body in real-life dreams of water using wonderfully soothing spray types from hand showers and overhead showers with diameters of 100 to 600 mm.

Spray types

IntenseRain

Stimulating water sprays that wash away tiredness and immediately make the person feel nice and awake. The perfect and quick way to feel fit for the day ahead. The powerful spray also effortlessly rinses shampoo out of hair.

Massage

An invigorating spray that soothes and causes everyday stresses to flow down the drain. The water sprays are concentrated to ease tense spots. For an indulgent and relaxing spa-like shower, every single day.

PowderRain

Relaxing, micro-fine droplets that gently and quietly envelop the body. The water is transformed into a delicate cocoon that sensually embraces the body. For sensual showering and indulgent, deep relaxation.

Vernis Blend

Sustainability

EcoSmart

This shower head uses up to 40% less water than our conventional showers. In this way, it reduces water and energy costs every day and conserves valuable resources. For long-lasting soothing showering pleasure.

Technologies

QuickClean

Who actually likes cleaning? Limescale deposits and dirt disappear in an instant with this technology. Simply rub the flexible silicone discs or nozzles with a finger. It's fast and keeps cleaning to a minimum.

XXL Performance

XXL showering indulgence that envelops the complete body in real-life dreams of water using wonderfully soothing spray types from hand showers and overhead showers with diameters of 100 to 600 mm.

Spray types

IntenseRain

Stimulating water sprays that wash away tiredness and immediately make the person feel nice and awake. The perfect and quick way to feel fit for the day ahead. The powerful spray also effortlessly rinses shampoo out of hair.

Rain

Invigorating and energising everyday showering indulgence with a satisfyingly full shower rain. With its small outlets on the shower head, this spray type works efficiently to thoroughly rinse out shampoo.

S53

Installation

Top Mounted Installation

Top-mounted installation is the conventional type of installation and best for wooden or laminate worktops. The sink is inserted from above into a hole cut out of the worktop. This is easy to do and makes the flat edge of the sink look really great.

Under Mounted Installation

The undermount installation sinks the sink into the countertop and is attached to the countertop from below. This type of installation is only suitable for water-insensitive countertops made of natural stone, concrete or quartz.
