iBox universal 2/new finish sets RainDrain/XtraStoris

Technical manual

iBox universal 2

RainDrain

XtraStoris

The future is here.

The iBox universal 2:
faster, smarter, more flexible

This is the new standard in concealed bathroom installation: The iBox universal 2 offers reduced complexity and enables an even faster, safer, and more flexible installation. This is ensured by intelligent features such as the practical sliding sleeve, a pre-mounted seal and the pre-assembled function block. Installation is now even faster with the new iBox universal 2 and new finish sets than it was with the previous model.

Thermostat ShowerSelect Comfort E

DuoTurn S **tap**
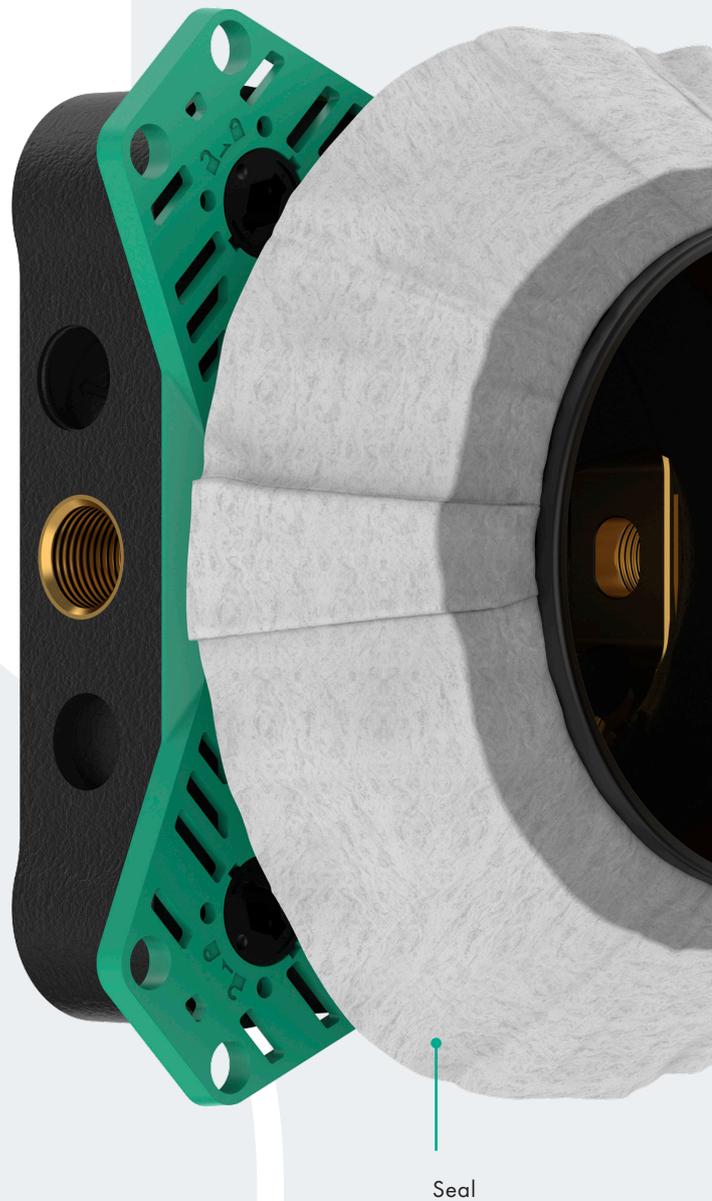

Seal

The iBox universal 2
at a glance:

- More mounting options with the new mounting ring
- New sliding sleeve, so no more cutting necessary
- Nothing is lost or forgotten thanks to the pre-assembled seal
- EPP (expanded polypropylene) foam sheathing ensures excellent noise and thermal insulation
- Acoustic decoupling means all new finish sets fall under acoustic group 1
- Easy alignment through protective cap with sturdy supports for spirit level

- Rotational symmetry (all connections are the same), so it can be used universally with fewer errors and less complexity
- Suitable for standard pipe dimensions thanks to 4 Rp ½ connections
- ETAG-compliant damp proofing for the masonry
- More safety through compliance with the EN1717 standard

Finish set
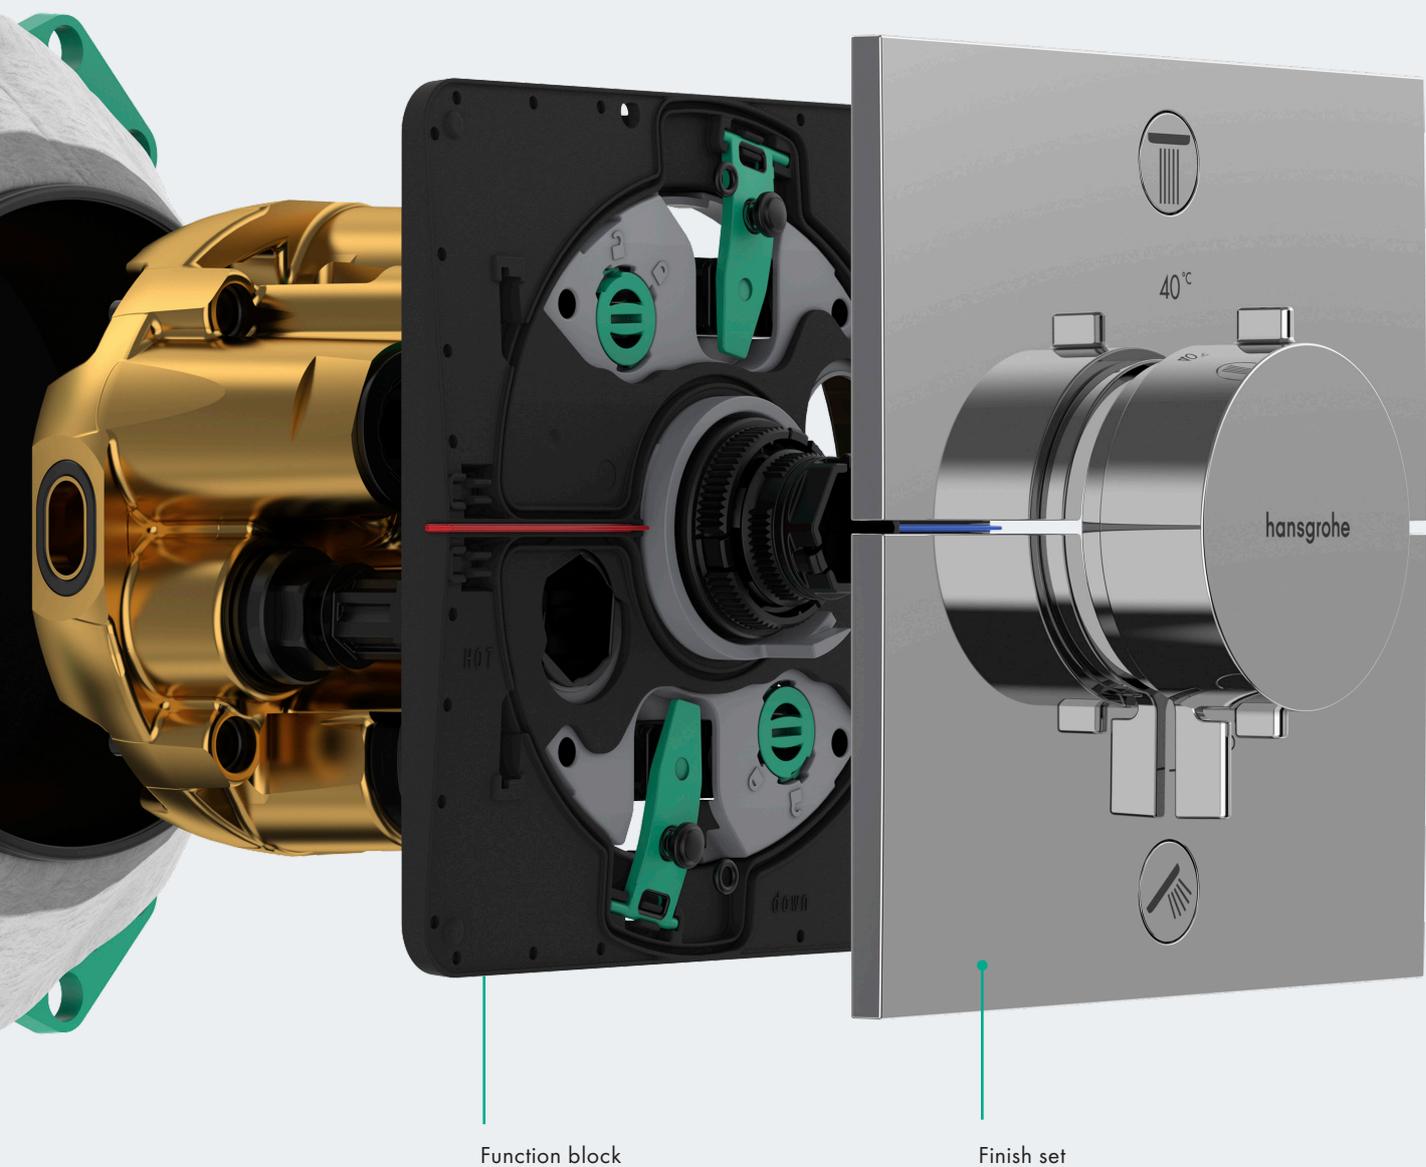

The evolution of a revolution

With the launch of the iBox universal – a base set for concealed installations – in 2001, hansgrohe revolutionised bathroom installation and design. And now it's time for the new generation of this successful model: the iBox universal 2, which offers you more safety, speed, and convenience than its predecessor. You will be ideally equipped for future installations with the new iBox universal 2.

The latest evolution of the iBox universal draws on years of experience with over 11 million installed products and continuous feedback from specialists, from planners, and from you. The result: The new iBox universal 2 reduces complexity, is suitable for universal use, and enables fast and error-free installation. It combines the proven advantages of its predecessor with plenty of new features and benefits. It can also be used with all existing and future hansgrohe and AXOR finish sets (existing set-ups require an adapter, sold separately).

The iBox universal 2 is therefore a core component of our all-in-one shower area by hansgrohe – from the base set for concealed installation to finish sets, taps, and RainDrain shower channels right through to XtraStoris wall alcoves. Welcome to the shower zone where everything is technically and visually coordinated.

Installation is **now** twice as fast with the new iBox universal 2 and new **finish sets as it was with** the previous model.

hansgrohe

iBox universal 2
0150018X

Time-saving installation, more mounting options, fewer installation steps – all this makes the new generation of the iBox even safer, more efficient, and more flexible.

# The perfect fit: iBox universal 2 and new finish sets

The iBox universal 2 offers numerous new and impressive features for added simplicity, safety, and comfort, both during installation and beyond. Installing the new ShowerSelect Comfort and DuoTurn finish sets is also even faster and more convenient with the iBox universal 2.

Integrated circular level avoids installation errors

ShowerSelect Comfort –
intuitive control at the touch of a button

The new ShowerSelect Comfort thermostatic mixer impresses users with its high-quality design and convenient operation:
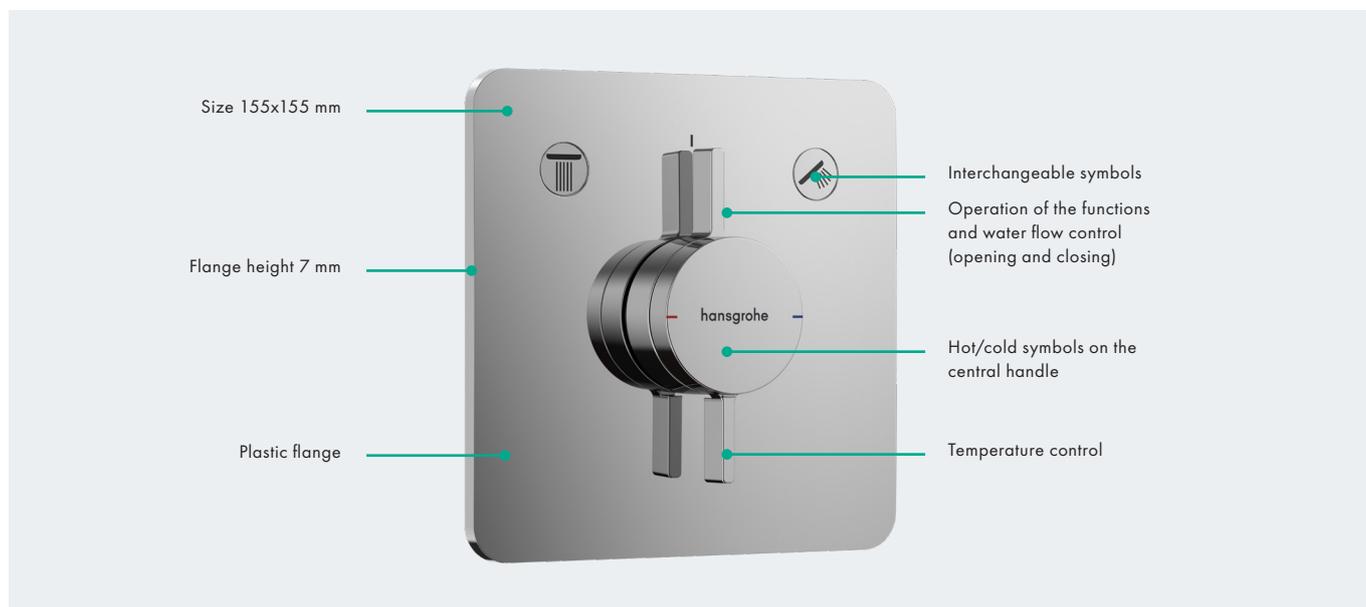

- Control up to four outlets thanks to Select
- Convenient operation via full-width metal Select buttons
- Targeted water flow control including EcoStop function via central handle

- Easy to clean as buttons are installed flush with the surface
- Variety of shapes: square, SoftCube, and round
- Variety of finishes: Chrome, Matt Black, Matt White, Brushed Black Chrome, and Brushed Bronze

Convenient and compatible: the key innovations

When we develop new products, we always make sure they make work easier for you, offer the best possible safety, and enable faster installation times. Numerous innovative product features in the iBox universal 2 ensure this. The new iBox universal 2 is compatible with all current hansgrohe and AXOR overhead showers and finish sets (adapter can be ordered by quoting article number 13588000). The iBox universal 2 also ensures you are ideally equipped for the future today, as it features four pipe slots ready for any future finish sets.
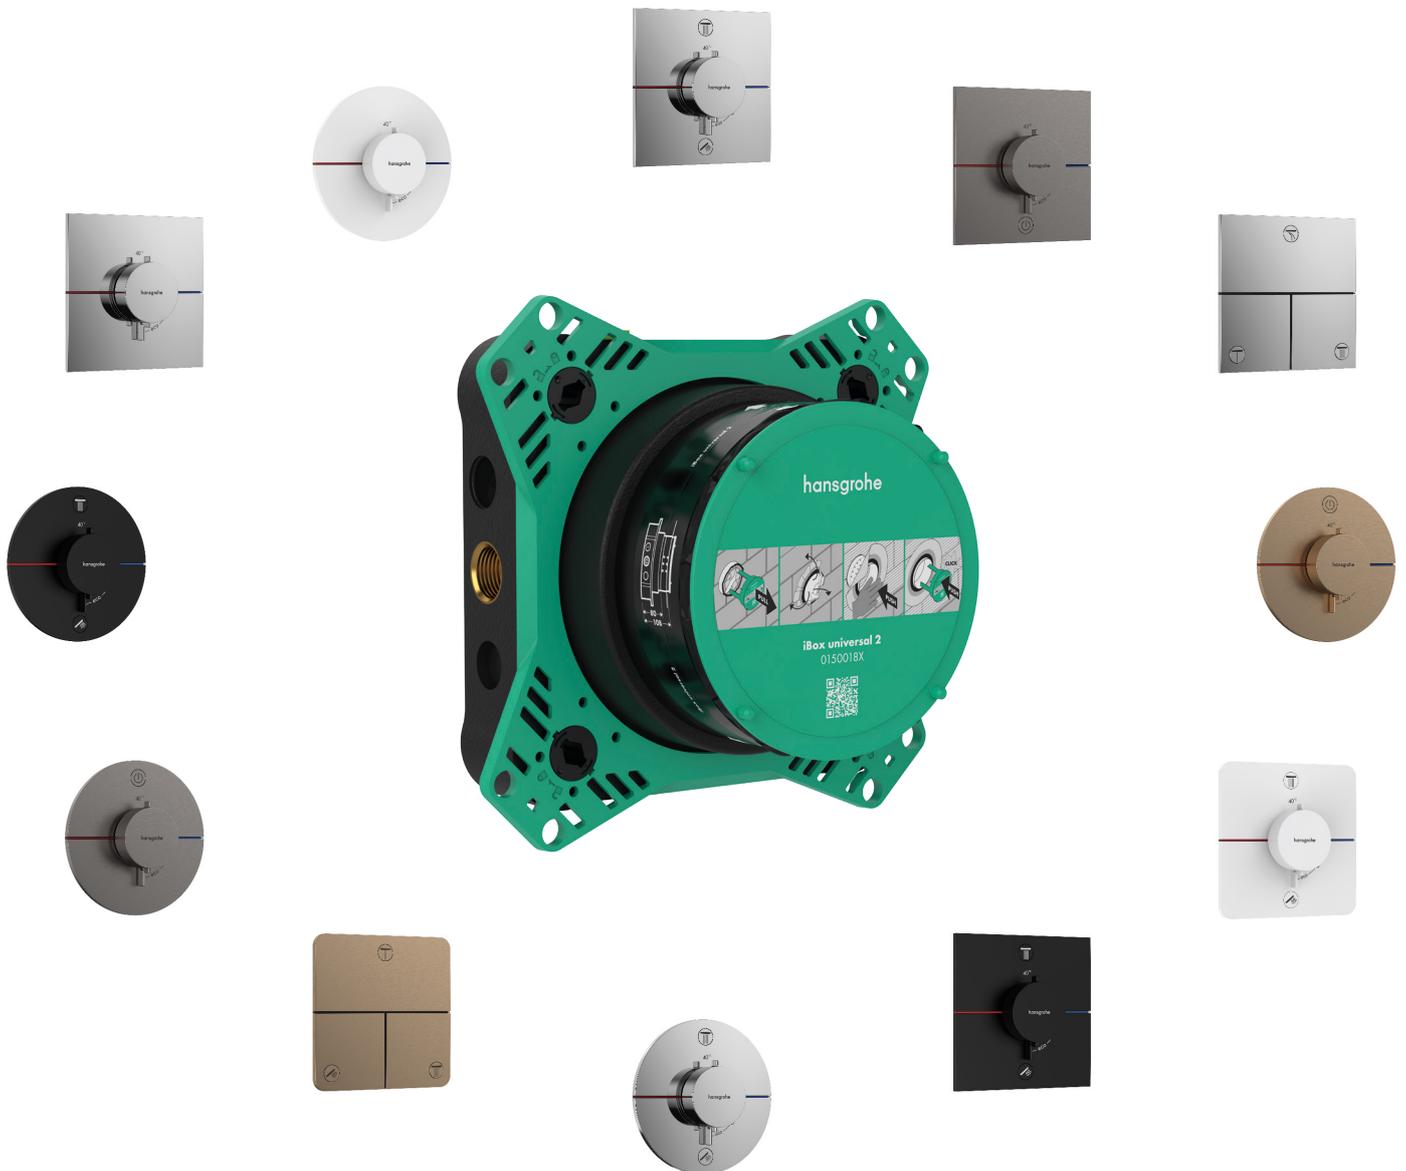

Mounting ring for all installation types

Whether installing the iBox universal 2 in or on the wall, the integrated mounting ring can be attached to the front or back of it to make fitting extremely easy in all installation scenarios.

Sliding sleeve for installation without cutting

The sliding sleeve is very easy to slide in, no matter how deep the concealed basic set is installed. This makes the waterproof box even easier, faster, and safer to install.

Pre-assembled seal – no more going without

Something you can no longer forget: The pre-assembled seal is an integral component of the sliding sleeve, so it is always within reach to simplify installation. It is also continuously elastic and waterproof.

EPP foam insulates sound and heat

Made of expanded polypropylene (EPP foam), the iBox universal 2 is great at absorbing sound and insulating heat. The sustainable material is lightweight, waterproof, and easy to recycle.

Pre-assembled function block – a fab innovation

With the pre-assembled function block for the finish sets, you need fewer tools, save time during installation, and are always on the safe side. It is made of high-quality metal and is therefore extremely durable. Good to know: Plastic screws now no longer need to be cut off.

# Fast and flexible to install

The individual installation steps are now even easier and faster to complete with the iBox universal 2: Be more flexible with the installation and on the safe side when it comes to waterproofing and avoiding errors.

Installing the iBox universal 2

1

Undo the set screws and remove the mounting ring.

2

Install the connection fittings. Pro tip: Clamp the pipe nipple for a secure fit.

3

Affix the mounting ring and then fit the iBox universal 2.

4

Adjust the depth, align and fix the iBox universal 2 in place.

5

After covering, fit the sliding sleeve to size and attach the maintenance joint.

6

Unfold and adhere the seal. Apply the protective cap.

Installing the finish set

1

Remove the protective cap and take out the flushing block.

2

Install and fit the function block.

3

Loosen the locking mechanism, align and set the carrier escutcheon.

Press on the carrier escutcheon and lock back in place.

4

Set the depth and actuate the Select valves.

5

Attach seal profiles.

6

Fit the buttons, volume control, and thermostatic mixer handle.

Installation options

The rotation-symmetrical base set of the iBox universal 2 can be used universally – horizontally or vertically. It can be installed in front of, on or in the wall, and on carrier systems or installation plates to suit the structural conditions. The iBox universal 2 is suitable for installing baths and showers. Here are a few installation examples:
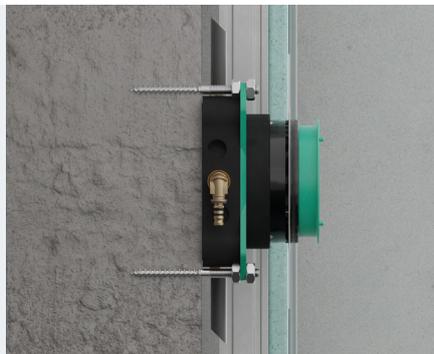

Installation on the wall
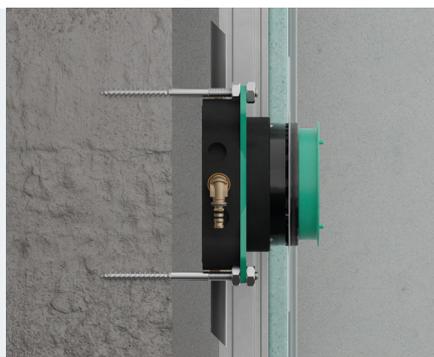

Installation in front of the wall

(Here using variable spacers with M 10 hanger bolts)
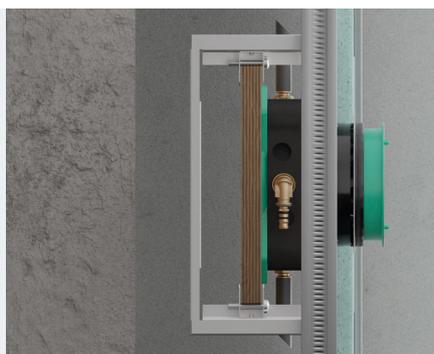

Installation on a carrier system

Installation directly in the wall

Installation with a set of mounting rails

Rotation-symmetrical installation

The symmetrical design ensures all connections are the same. It is important that cold water is connected on the right and hot water on the left. Either the upper or lower outlet can be connected for use as a shower tap.
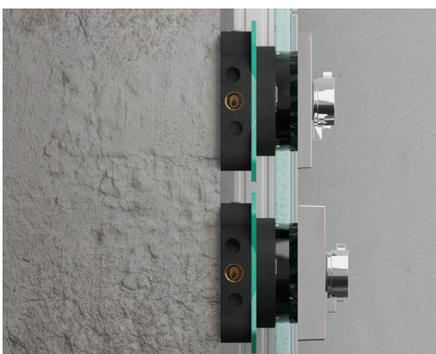

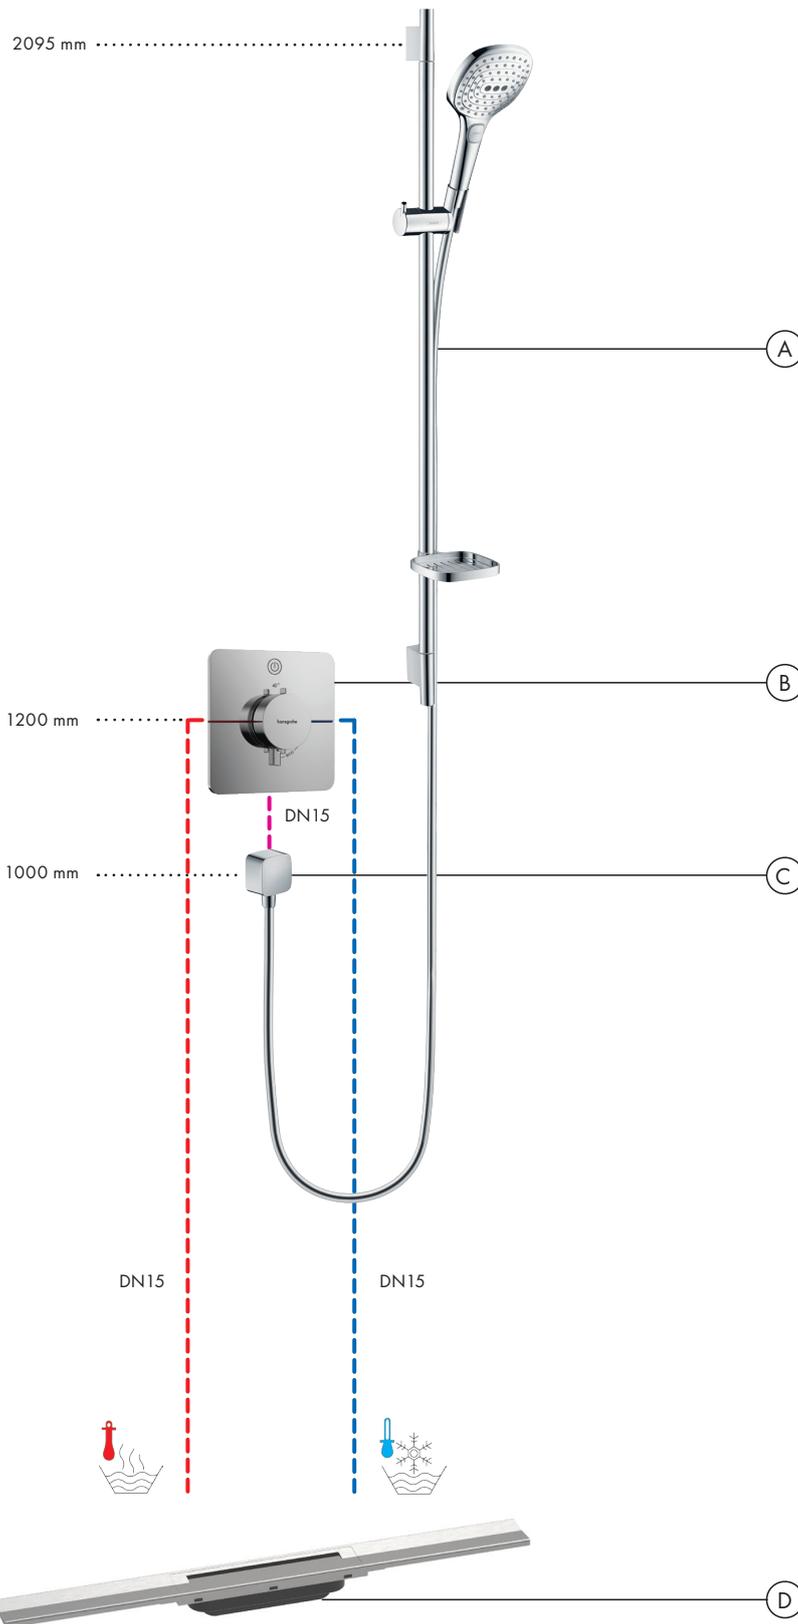

Wall flange extension

The extension ensures that even shallow installation depths are no longer a problem. The extension wall flange enables the iBox universal 2 to be installed even in shallow walls.

Planning and installation information

Base set
Fit the base set with the **hot water connection on the left** and the **cold water connection on the right.** Installation depth: 80 mm to 108 mm.

Installing the base set
The base set can be fitted to suit the structural conditions. The iBox universal 2 is suitable for installing both bath tubs and showers.
With shower installations, the outlet that is not required needs to be stopped with a plug.

The rotation-symmetrical base set of the iBox universal 2 can be used horizontally or vertically.

Tips for the bath tub

iBox universal 2 in combination with Exafill bath filler with waste and overflow set:
switch off water to the Exafill during the construction stage!

Basic installation:
1. Install iBox universal 2
2. Lay pipelines to the Exafill and block (metal plug)
3. Flush and press pipe system

Place bath tub:
1. Switch off water
2. Install bath tub with Exafill and connect to mains water
3. Flush pipe to the Exafill with sample filler necks and check for leaks
4. Switch off water at floor level
5. Remove flushing block
6. Insert plug (A) in outlet flushing block
7. Fit flushing block
8. Switch on water

Sinks

Flush complete installation as per DIN 1988/EN 1717. The arrows on the flushing block indicate which inlet is connected to which outlet pipe, for instance cold water to outlet 1 and hot water to outlet 2. If only one outlet is required, then the flushing block needs to be rotated by 90° after the first flush.

Outlet 2

Technologies

Easy Installation
Fast, safer, and more secure installation – several features are there to ensure simple installation.

Water Damage Protection
The high-quality installation kit features a pre-assembled seal and is 100% waterproof.

Select
A simple way to control the water flow, shower or spray type at the touch of a button.

Safety Stop
Safety lock at over 40 °C – temperature limitation, which prevents excessively hot water from flowing.

Water Flow Control
Actively regulates water consumption – the amount of water can be adjusted via the control dial.

EcoSmart
Shower that consumes up to 40% less water than our standard shower heads and therefore also cuts energy costs.

Eco Smart+
This economical shower head consumes up to 60% less water than our standard showers. This also cuts energy costs.

RainDrain:

Systematic drainage

Pretty.

One base set for all.

Clever.

One bathroom, one look.

uBox universal

One base set for all installation scenarios

**uBox universal

Technology

Minimum cleaning combined with higher drainage capacity

Drainage reinvented: Dryphon

The design and high flow rate prevent dirt and hair from attaching, minimising cleaning efforts. The patented design offers a significant improvement in drainage capacity up to 60 litres per minute, exceeding all standard requirements and regulations.

The Dryphon system opens and closes with a flexible membrane. This membrane allows water to pass through when needed while blocking sewer gases when no water is flowing through. Also, because it does not rely on a traditional water seal to seal the connection to the sewer, it cannot dry out while still controlling pressure differences in the sewer.

hansgrohe Siphon technology
• High drainage capacity up to 42 l/min
• Low dirt adhesion, as manufactured without seams
• Easy to clean, as can be dismantled
• Removable
• Minimal installation depth
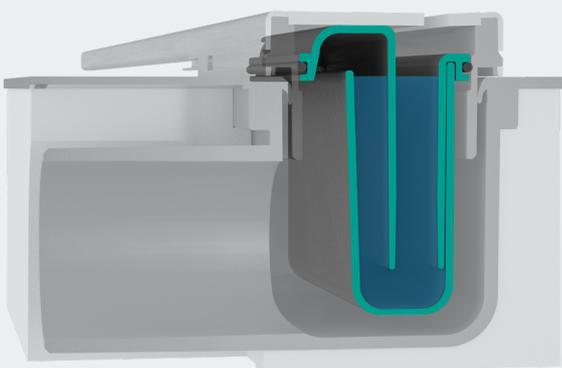

hansgrohe Dryphon technology
• Significantly higher drainage capacity up to 60 l/min
• Durable and temperature-resistant membrane
• Minimal cleaning required, no siphon resistance
• Removable
• Minimal installation depth
• Full odour barrier
• Cannot dry out
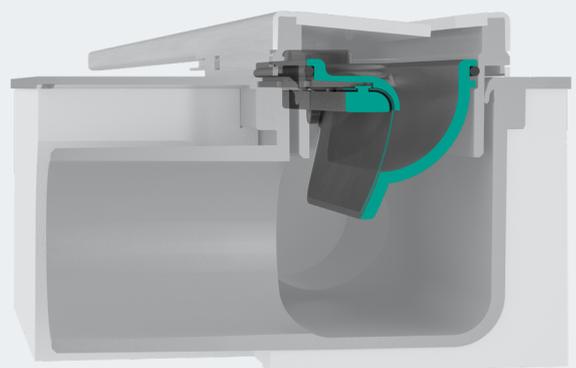

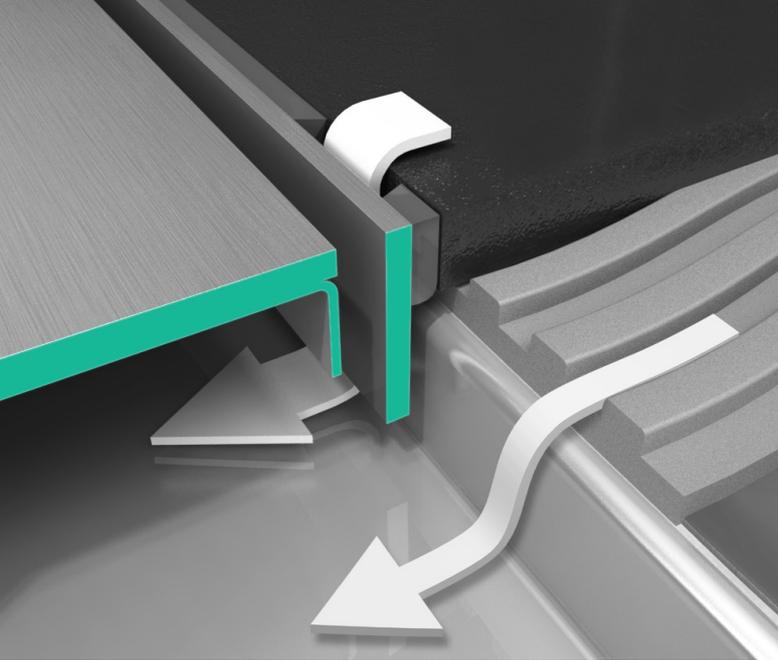

Secondary drainage

With the RainDrain Match and Brilliance, the height-adjustable frame is not only used to level to tile thickness, but also for secondary drainage. With secondary drainage, water entering through the sealing joints or faulty tile joints will drain into the shower channel thanks to the slope.

For secondary drainage, the entire wet area must be professionally sealed and no sealing must be applied below the service joint between the frame and the installation set.

Pre-assembled sealing membrane as per DIN 18534

Planners and contractors are required to comply with numerous works contract provisions. The pre-assembled sealing membrane was developed as a standard to prevent mistakes when installing shower drains in combination with waterproofing system.

Height adjustment   Select suitable height
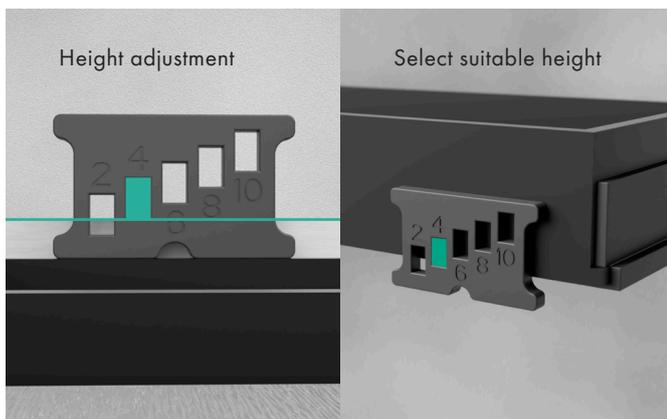

Height flexibility

The finish set can be easily adjusted to different heights by using either the grate or the height adjustable frame. The sturdy Stainless Steel frame adapts to tile thicknesses of 7-18 mm, making installation easy and safe.

Easy to clean siphon and surface

Parts to order

When ordering a linear shower drain together with the uBox system, there are two part numbers:
1. finished set
2. base set / uBox universal (with or without an installation set, depending in on the product line)

Choose between the uBox for standard installation (50 mm water seal), uBox for low installation (30 mm water seal) or the uBox with vertical outlet.

XtraStoris: storage space for your dream bathroom

XtraStoris complements the overall look of the shower place and toilet area. This accessories range is all about high-quality materials and manufacturing processes. These niches are reliable and protected against water damage thanks to the waterproof installation set and sealing membrane supplied.
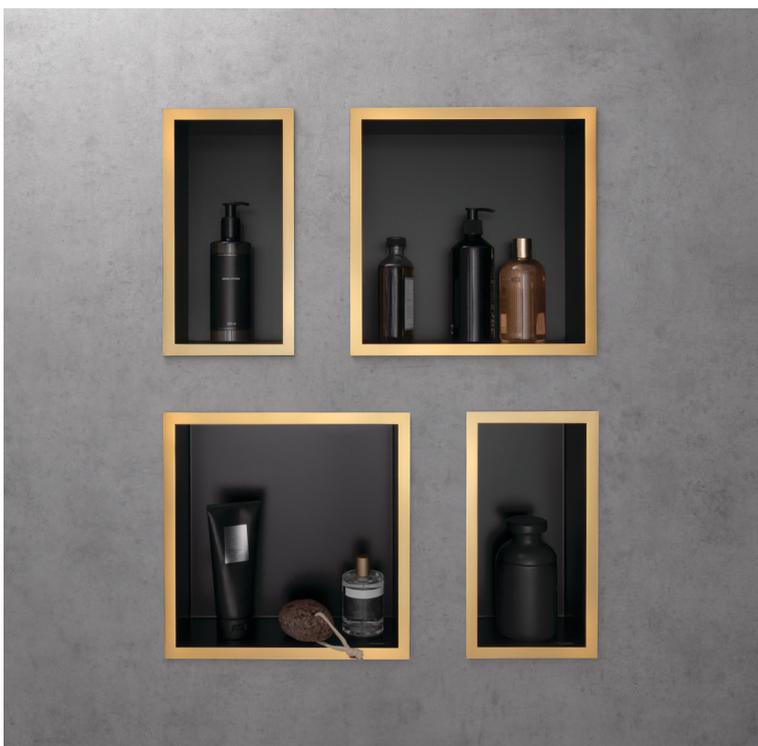

XtraStoris Original: Wall niche with integrated frame up to 90 cm wide available in the colors Matt Black, Matt White and Concretegrey.

XtraStoris Minimalistic: Frameless wall niche available in various formats and finishes. This niche has a variable installation depth which means it can be installed flush with the tile or protruding as a design element.

XtraStoris Individual: The XtraStoris Individual body and frame finishes are to be combined individually. The design frames are available in Brushed Stainless Steel plus all hansgrohe FinishPlus surface finishes. The body is available in Matt Black, Matt White and Brushed Stainless Steel.

XtraStoris Rock: Tileable wall niche and toilet brush holder with push-open door. The installation depth can be adapted to the tile thickness. The storage space either merges almost seamlessly with the wall or is used as a design accent.

Time-saving and watertight installation

XtraStoris at a glance:

- Waterproof installation set that is safe and ensures comfortable showering in the long term.
- Simple, time-saving installation.
- Suitable for brick-wall and dry-wall construction.
- Easy-to-clean surface.
- Space-saving solution for design-conscious bathroom owners who appreciate optimum freedom of movement when showering.
- High-quality solution available in four versions, numerous surface finishes and dimensions.

For brick-wall and dry-wall construction
