Joy from all angles: The new hansgrohe Rebris line of taps brings new freshness to the bathroom with delicate aesthetics in two design variations, trend-conscious finishes, premium quality, easy cleaning and new, innovative EcoSmart+ technology.

Rebris is the new range of taps from hansgrohe that not only impress with their sophisticated product design, but also help to significantly reduce water consumption using the latest, innovative EcoSmart+ technology.

Available in the UK from October 2022, the new Rebris line of taps from hansgrohe focus on design, technology, and function. Available in two different design variations, Rebris S with soft curves and Rebris E with clean lines, the new range incorporates sustainability and smart features that make everyday life easier.

To meet the personal needs of the user and match a large range of bathroom settings, both the Rebris S and Rebris E have a sleek appearance with a sophisticated tap handle. Available in different heights, as well as

chrome and matt black finishes, the Rebris S blends harmoniously into a variety of bathroom styles with a soft, round silhouette whereas the Rebris E is straight-lined and angular.

This design aesthetic continues throughout a wide range of hansgrohe products, from bath taps to single-lever fixtures for the shower. Other hansgrohe products, such as AddStoris accessories or Vernis hand-held showers also compliment the new Rebris tap line.

Even (Eco)Smarter in Everyday Life

The new Rebris line also incorporates pioneering EcoSmart+ technology, that aims to reduce water consumption to just 4 litres per minute at 3 bar standard pressure. As a result, Rebris reduces water flow by 20 percent compared to existing EcoSmart products.

Further sustainability features are offered via CoolStart technology. CoolStart ensures that the tap automatically delivers cold water when the handle is in the middle position, and therefore ensures no unnecessary energy is consumed by heating the water. You will still be able to get hot water with CoolStart technology, only when it is really needed. This simple upgrade to a bathroom will help reduce the amount of water used and help lower heating bills too.

The new Rebris taps also have a Coin Slot aerator, so that the fitting can be simply detached with a coin for easy cleaning.
