

ComfortZone Test de Hansgrohe

Cada lavabo con su grifería a juego. Para clientes satisfechos.

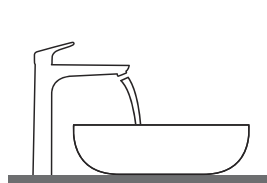

Las molestas salpicaduras y manchas de agua que se producen por una combinación de grifería y lavabo inadecuada son muy desagradables. A partir de ahora, la irritación que ello produce en los clientes es cosa del pasado.

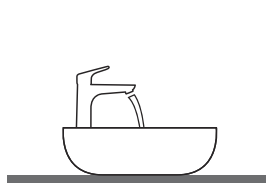

Hansgrohe ha probado su grifería en combinación con los lavabos más comunes de los principales fabricantes de cerámica, sometiéndola al ComfortZone Test, un procedimiento de comprobación en condiciones reales, desarrollado por la propia empresa. Este test de funcionalidad entre lavabo y grifería pretende comprobar el espacio disponible debajo del grifo y el tipo de salpicaduras que se producen. Más información sobre el ComfortZone Test en www.pro.hansgrohe.es/comfortzone-test

Tipos de cerámicas

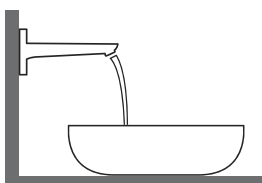

Hansgrohe dispone siempre de la grifería ideal para los tipos de lavabo más comunes. El ComfortZone Test de Hansgrohe constituye un completo apoyo de asesoramiento para la instalación perfecta de grifería y lavabo para un lavado de manos cómodo y sin salpicaduras. El ComfortZone Test de Hansgrohe se aplicó a cinco tipos de cerámicas diferentes:

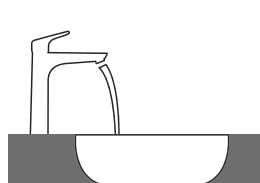

Lavabo con la grifería en la parte trasera de la cerámica

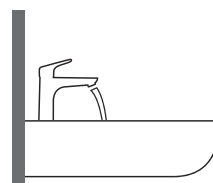

Lavabo con la grifería encima de la cerámica

Lavabo con la grifería en la pared

Lavabo empotrado o sobre encimera con grifería de posicionamiento flexible

Lavabos de pared con la grifería encima de la cerámica
